terms of the implicit assumption supporting each approach

Reflections on Counselling Windy Dryden, 1993 Drawn from his wealth of experience as a counsellor and trainer this book comprises thirty brief reflections in which Windy Dryden addresses some of the most important aspects of the counselling process The book opens with five pieces that consider the authors major personal counselling interests and other general issues The following section examines the influence of Arnold Lazarus on his thinking about counselling Dryden then discusses his interests in the use of language in counselling and also deals with ethical issues In the fifth section the author relates three memorable encounters with clients and in the sixth section he outlines a number of issues relating to counsellor education and training The final section draws together five pieces describing some of Dryden s important personal experiences The book will be of interest to anyone in the field but is particularly well suited for use on training courses where each piece may serve as a stimulus for discussion

Intuition in Psychotherapy and Counselling Rachel Charles, 2004-10 Since nonverbal messages have been shown to dominate interpersonal communication and since their cues are gathered intuitively it is clearly a distinct advantage for therapists and counsellors to be familiar with this phenomenon Based on original research into intuition within clinical practice Rachel Charles provides in depth explanations of the process appropriately illustrated with models and case histories This includes intuition s allo logical and global aspects its relationship to empathy and its links with spiritual practice A theoretical framework is thus provided for its comprehension and teaching While some people are naturally more intuitive than others the author makes a number of practical recommendations whereby the faculty of intuition can be cultivated by therapists increasing receptivity to unconscious messages and helping the client to achieve insight Clinicians training institutes their tutors and students and indeed anyone working with people will find this book a valuable resource for the enhancement of professional practice
