You will learn the basic fundamentals of SAP SD with examples based on a case study approach. Using a fictional company scenario, you will learn the fundamentals of the order to cash process and key flow from sales order delivery to billing document. Explore the foundational document: the sales order. Obtain detailed information on master data and how it is used in SD. Dive into master data objects: business partners and material masters. Review how master data is connected to sales orders and pricing. Understand sales order processing including item categories, availability checking, dates, shipping texts, and more. Walk through delivery processing and billing. Familiarize yourself with two of the major SD pre-sales documents: contracts and quotations. Delve into the post-sales processes including returns, service, and debit and credit memos. Look at transactional list reports and analytical reports. For readers who are new to SAP SD in S/4HANA, the detailed case study, practical examples, tips, and screenshots quickly bring readers up to speed on the fundamentals.
