Modularity in Syntax Ann Kathleen Farmer, 1984 This book clarifies some of the central issues in Japanese syntax pointing the way to solving several long standing problems It presents an alternative to the Standard Theory model which has dominated Japanese linguistics for a number of years Following the study of the syntactic and lexical levels of representation in Japanese the book brings the same theoretical perspective to bear on English Although Japanese a so called nonconfigurational language is typologically far removed from Indo European languages Farmer shows that Modular Grammar which was primarily developed to account for an exotic language yields insights into English as well In particular she examines the status of pronouns and anaphors Aspects of Government Binding theory are adapted for both Japanese and English providing significant evidence that still evolving theories have wide and possibly universal validity Modularity in Syntax concludes by comparing Japanese and English speculating on the extent to which the typological differences between them are a function of the nature of the rules and principles that mediate between the syntax and the lexical structure of the two languages Ann Farmer is an Assistant Professor in the Department of Linguistics at the University of Arizona This book is the ninth in the series Current Studies in Linguistics edited by Samuel Jay Keyser

Modularity in Language Etsuyo Yuasa, 2005 In *Modularity in Language* Etsuyo Yuasa investigates exceptions and idiosyncrasies in various complex clauses in Japanese and English within the framework of multi modular approaches to grammar She proposes original analyses of various complex clauses in Japanese and English which deviate from the norms of other complex clauses in the same language or in other languages and shows how these cases of syntax semantics mismatch justify the independence or autonomy of different levels of grammatical structures Yuasa's significant contribution is the incorporation of the notion of construction from Construction Grammar into multi modular approaches to grammar She claims that the idiosyncratic cases examined in this study are instances of constructional and categorial mismatches where a syntactic representation of a prototypical construction is paired with a semantic representation of another prototypical construction *Modularity in Language* is aimed at those interested in grammatical theories in general the parallel architecture of grammar including Lexical Functional Grammar Autolexical Grammar Representational Modularity Constructional Grammar syntax semantics interface and Japanese linguistics

The Modular Architecture of Grammar Jerrold M. Sadock, 2012-01-12 Modular grammar postulates several autonomous generative systems interacting with one another as opposed to the prevailing theory of transformational grammar where there is a single generative component the syntax from which other representations are derived In this book Jerrold Sadock develops his influential theory of grammar formalizing several generative modules that independently characterize the levels of syntax semantics role structure morphology and linear order as well as an interface system that connects them Multi modular grammar provides simpler more intuitive analyses of grammatical phenomena and

allows for greater empirical coverage than prevailing styles of grammar The book illustrates this with a wide ranging analysis of English grammatical phenomena including raising control passive inversion do support auxiliary verbs and ellipsis The modules are simple enough to be cast as phrase structure grammars and are presented in sufficient detail to make descriptions of grammatical phenomena more explicit than the approximate accounts offered in other studies **Grammar in Mind and Brain** Paul D. Uncertainty in Artificial Intelligence 2 L.N. Kanal,J.F. Lemmer,2014-06-28 This second volume is arranged in four sections Analysis contains papers which compare the attributes of various approaches to uncertainty Tools provides sufficient information for the reader to implement uncertainty calculations Papers in the Theory section explain various approaches to uncertainty The Applications section describes the difficulties involved in and the results produced by incorporating uncertainty into actual systems **Sentence Comprehension** David J. Townsend,Thomas G. Bever,2001 Using sentence

comprehension as a case study for all of cognitive science David Townsend and Thomas Bever offer an integration of two major approaches the symbolic computational and the associative connectionist The symbolic computational approach emphasizes the formal manipulation of symbols that underlies creative aspects of language behavior The associative connectionist approach captures the intuition that most behaviors consist of accumulated habits The authors argue that the sentence is the natural level at which associative and symbolic information merge during comprehension The authors develop and support an analysis by synthesis model that integrates associative and symbolic information in sentence comprehension This integration resolves problems each approach faces when considered independently The authors review classic and contemporary symbolic and associative theories of sentence comprehension and show how recent developments in syntactic theory fit well with the integrated analysis by synthesis model They offer analytic experimental and neurological evidence for their model and discuss its implications for broader issues in cognitive science including the logical necessity of an integration of symbolic and connectionist approaches in the field *Syntactic Modularity* Melissa Ann Lewis,1997

The Lexicon-Encyclopedia Interface Bert Peeters,2021-10-01 Questions about the exact nature of linguistic as opposed to non linguistic knowledge have been asked for as long as humans have studied language be it as linguists philosophers psychologists language teachers semioticians or cognitive scientists This distinction has been maintained and defended by some attacked and abandoned by others Through specially commissioned papers for this the fifth volume in the Current Research in Semantics Pragmatics Interface series contributors argue both for and against the distinction between lexical knowledge and encyclopedic knowledge and debate how it should be drawn Mind Matters David Steier, Tom Michael Mitchell,1996 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company Syntactic Constraints, Modularity and the Linguistic Effects of Spreading Activation Paul Deane,1989 **Syntactic Theory and the Dialects of Italy** Adriana Belletti,1993 Cognitive Science: Discourse comprehension, reasoning Koen Lamberts,2008

An Introduction to Government-binding Theory in Chinese Syntax Yuanjian He, 1996 One of the major concerns of current linguistic theory is to determine the set of general principles to which the syntactic structure of all natural languages conforms and in this connection it is important to examine a variety of language families and types Though since the 1980s current linguistic theories such as the government binding theory have been applied to Chinese this volume takes up issues to which previous investigations did not pay much attention or gave less comprehensive treatment Its analysis of many aspects of Chinese syntax based on careful examination of data should be of interest and value to Chinese linguists whether G B oriented or otherwise

Verb Raising and Theta-driven Movement Akemi Matsuya, 2004 Under the framework of the Minimalist Program this book attempts to clarify that greedy movement in Japanese fulfills locality and is driven by checking theta roles as well as Case categorial features and so on as formal features The findings are as follows the Spec of TP and an uninterpretable V feature make successive cyclic verb raising possible thus producing a complex verb Multiple Predicate Formation MPF and the Spec TP parameter attribute nonobligatory controlled PRO in the subject position of the adjunct to checking the nominative Case at the Spec of TP within the adjunct Overt verb raising beyond the nonfinite clause boundary enables the long distance A movement in the control constructions The derivational difference among ni direct passives ni indirect passives and ni yotte direct passives is due to the three corresponding types of checking theta roles and Case The impossibility of scrambling ni indirect passives is predicted by the exhaustion of the theta roles The semantic difference between o causatives and ni causatives is caused by dative NP s checking Case and theta roles No passives of noncoercive causatives are produced because of the exhaustion of theta roles at TP The passivization in double object constructions are limited by the functions of dative markers in Case and theta role checking
