Binbin Yang, Jingjing Meng, Bingxiang Yuan, 2026-01-30 Geomaterials are one of the most common materials in the world According to the functions the geomaterials can be divided into different types such as soft soil granular aggregates and composite materials However with the development of underground engineering to the deeper part of the Earth the mechanical properties no matter what kind of geomaterials will change after being subjected to multiple environments including temperature field stress field seepage field and chemical field These changes may cause catastrophic damages to underground structures leading to economic losses and casualties With regard to multi factor coupled interactions extant studies on the characteristics of mechanical behaviors of deep geomaterials and the control theory of multi field coupling have manifested keen interests in the field of geology all over the world In order to ensure the stability of geomaterials under multi field coupling a growing body of investigations has been conducted which encompasses theoretical analysis analytical analysis numerical simulation simplified analysis laboratory test and field work It is thus of prime importance and necessity to understand the mechanical behaviors and rheological properties of geomaterials under different coupling conditions This Research Topic aims to present and disseminate recent advances in the dynamic response of geomaterials under multi field coupling We welcome theoretical experimental and numerical Original Research and Review articles to address the following themes that include but are not limited to Mechanical models of geomaterials Local non local deformation in geomaterials Strength and deformation characteristics of geomaterials under multi field coupling Failure mechanisms and risks of geomaterials in tunneling mining slope and dam Field investigation of deep geomaterials and associated geological disasters Numerical simulation of deep geomaterials and associated geological disasters Scaled model test with analogy materials Sustainability in geomaterials

Experimental Morphogenesis and Integration of Plants J. Sebanek, M. Kutacek, M. Luxova, O. Erdelska, Z. Sladky, S. Prochazka, 2012-12-02 In 1983 the book Experimental Plant Morphology was written in Czech by the above named authors Widespread interest in the publication outside Czechoslovakia encouraged the authors to prepare this new English edition Experimental Morphogenesis and Integration of Plants It is more than a mere translation of the original the contents have been extended and further aspects of structural integrity and regulation in plants have been included especially on the molecular cellular and tissue level The overall concept of the book is new and has been

supplemented with the latest information on the subject It aims to inform the scientific public of current studies on morphogenesis and structural integration in plants In addition this book will show the possible way of regulating morphogenesis and structural integrity in plants with regard to the practical needs of agriculture horticulture and silviculture
