Classical and Contemporary Sociological Theory Scott Appelrouth, Laura Desfor Edles, 2008 A unique hybrid of text and readings this book combines the major writings of sociology's core classical and contemporary theorists with an historical as well as theoretical framework for understanding them Laura Desfor Edles and Scott A Appelrouth provide not just a biographical and theoretical summary of each theorist reading but an overarching scaffolding which students can use to examine compare and contrast each theorist's major themes and concepts No other theory text combines such student friendly explanation and analysis with original theoretical works Key features include Pedagogical devices and visual aids charts figures and photographs to help summarize key concepts illuminate complex ideas and provoke student interest Chapters on well known figures such as Marx Weber Durkheim Parsons and Foucault as well as an in depth discussion of lesser known voices such as Charlotte Perkins Gilman WEB Du Bois and Leslie Sklair Photos of not only the theorists but of the historical milieu from which the theories arose as well as a glossary at the back

The Concept of Social Structure Douglas Porpora, 1987 Porpora is concerned with the concept of social structure and with the relationship between social structure and the individual He focuses on two different conceptions of social structure the Durkheimian conception which is the dominant way in which social structure is conceptualized by sociologists and an alternative conception based on a reading of Marx The author discusses in depth the various aspects of these two divergent theories and shows how the Marxian conception of social structure underlies even the newer structural analyses of racism sexism and power that go beyond Marxian theory He offers a sustained critique of Structural Sociology's theoretical elimination of the individual actor which results in a corresponding elimination of any form of agency from the explanation of social structural processes

Principles of Economic Sociology Richard Swedberg, 2009-10-08 The last fifteen years have witnessed an explosion in the popularity creativity and productiveness of economic sociology an approach that traces its roots back to Max Weber This important new text offers a comprehensive and up to date overview of economic sociology It also advances the field theoretically by highlighting in one analysis the crucial economic roles of both interests and social relations Richard Swedberg describes the field's critical insights into economic life giving particular attention to the effects of culture on economic phenomena and the ways that economic actions are embedded in social structures He examines the full range of economic institutions and explicates the relationship of the economy to politics law culture and gender Swedberg notes that sociologists too often fail to properly emphasize the role that self interested behavior plays in economic decisions while economists frequently underestimate the importance of social relations Thus he argues that the next major task for economic sociology is to develop a theoretical and empirical understanding of how interests and social relations work in combination to affect economic action Written by an author whose name is synonymous with economic sociology this text constitutes a sorely needed advanced synthesis and a blueprint for the future of this burgeoning field

Social Structures John Levi Martin,2009-07-27 Social Structures is a book that examines how structural forms spontaneously arise from social relationships Offering major insights into the building blocks of social life it identifies which locally emergent structures have the capacity to grow into larger ones and shows how structural tendencies associated with smaller structures shape and constrain patterns of larger structures The book then investigates the role such structures have played in the emergence of the modern nation state Bringing together the latest findings in sociology anthropology political science and history John Levi Martin traces how sets of interpersonal relationships become ordered in different ways to form structures He looks at a range of social structures from smaller ones like families and street gangs to larger ones such as communes and ultimately nation states He finds that the relationships best suited to forming larger structures are those that thrive in conditions of inequality that are incomplete and as sparse as possible and thereby avoid the problem of completion in which interacting members are required to establish too many relationships and that abhor transitivity rather than assuming it Social Structures argues that these patronage relationships which often serve as means of loose coordination in the absence of strong states are nevertheless the scaffolding of the social structures most distinctive to the modern state namely the command army and the political party
