

# Power structure

Power structure is a term that describes the hierarchical distribution of authority and influence within an organization. It encompasses the formal power that comes with job titles and positions, as well as the informal power that arises from personal relationships, expertise, and access to critical resources. Power structure defines who makes decisions, who has a say in those decisions, and how conflicts are resolved.

*The Structure of Community Power* Michael T. Aiken, Paul E. Mott, 1970      **Community Power Structure** Floyd Hunter, 2017-11-01 In this study of busy complex Regional City and it is a real city the author has analyzed the power structure from top to bottom He has searched out the men of power and under fictitious names has described them as they initiate policies in their offices their homes their clubs They form a small stable group at the top of the social structure Their decision making activities are not known to the public but they are responsible for whatever is done or not done in their community Beneath this top policy group is a clearly marked social stratification through which decisions sift down to the substructures chosen to put them into effect The dynamic relations within the power structure are made clear in charts but the real interest lies in the author's report of what people themselves say The African American community is also studied with its own power structure and its own complicated relations with the large community The method of study is fully described in an Appendix The book should be of particular value to sociologists political scientists city planning executives Community Council members social workers teachers and research workers in related fields As a vigorous and readable presentation of facts it should appeal to the reader who would like to know how his/her own community is run Community Power Structure is not an exposé It is a description and discussion of a social phenomenon as it occurred It is based on sound field research including personal observation and interviews by the author      Community Power Structure William S. Dant, 1972      **Community Power and Empowerment** Brian D. Christens, 2019-01-09 Many people want to help bring about changes in their neighborhoods workplaces and communities Leaders and scholars of change efforts are likewise eager for insights into what makes some organizations and coalitions capable of building and exercising power Why are some groups successful in making changes in policies and systems and in sustaining their momentum over time while others struggle or never really get off the ground With *Community Power and Empowerment* Brian D Christens brings the most comprehensive analysis of empowerment theory yet conducted to bear on these questions taking aim at many of the longstanding weaknesses and ambiguities of empowerment theory research and practice For example one major hindrance is that most notions of empowerment have not been coherently connected with community power In addition research has emphasized psychological aspects of empowerment over organizational processes and has neglected community empowerment processes to an even greater extent By linking empowerment and community power Christens constructs a holistic framework for assessing and comparing community driven change efforts This book offers new guidance for inquiries into outcomes and impacts of empowerment processes on health and well being providing a resource for researchers organizational leaders practitioners and anyone interested in collective action for change      *Community Practice* David A.
