Structure Interaction And Social Theory:

Structure, Interaction and Social Theory (RLE Social Theory) Derek Layder, 2014-08-21 A central problem in contemporary social theory is that of providing an account of social interaction that does justice both to the self monitoring capacities of the individuals involved and to the society that frames the interaction This book attempts to resolve this problem arguing for an objectivist or structuralist account which does not undervalue the importance of the indexical and negotiated aspects of interaction and which takes seriously the Marxist rationalist critique of empiricism and humanism and the associated idea that society should be treated as a supra individual preconstituted and constraining object of scientific analysis First Dr Layder pinpoints certain of the strengths and weaknesses of various schools of thought social psychology scrutinized in both its sociological and psychological forms sociology the Marxist rationalist approach Whilst rejecting the mechanistic or naively deterministic theories which are often associated with an objectivist stance he argues that the productive activities of situated actors must be understood as existing in an articulated relationship with and within sets of preconstituted contextual constraints This thesis is illustrated conceptually by the development of a framework which distinguishes two types and levels of social structure with different modes of production and reproduction and empirically by an analysis of aspects of interaction in the occupation of acting

STRUCTURE, INTERACTION AND SOCIAL THEORY
ANDREW ANDERSON., **Agency and Structure (RLE Social Theory)** Piotr Sztompka, 2014-08-21 A striking feature of the human condition is its dual contradictory inherently split character on the one hand autonomy and freedom on the other constraint and dependence on social structure This volume addresses this central problem of the linkage between human action and social structure in sociological and social science theory Contributions cover several different approaches to the agency structure problematic and represent the work of a number of leading international sociologists Their efforts point to a reorientation of social theory both on philosophical and methodological levels

Explorations in Structural Analysis (RLE Social Theory) Ronald Breiger, 2014-08-21 At a time when most of the innovative techniques in empirical sociology concern themselves with networks of relations among variables such as indices of occupational prestige education and income the central theme of this volume is that there is much substantive insight and analytical leverage to be gained from a conceptualization of social structure directly as regularities in the patterning of relations among concrete entities The view adopted here is that variate distributions measure selected consequences of structural pattern of the actual connections among individuals or organizations and as such they are useful indicators of questions to be asked in analyzing social structures directly but they are neither descriptions nor analyses of the structure itself

Orvis F. Collins, June M. Collins, 1969* *The Social Theory of Georg Simmel* Nicholas John Spykman, 1925 **The Realist Image in Social Science** Derek Layder, 1990 This work sets out to provide a critique and account of the development of the new realist philosophy of social science as it is specifically applied to sociology and social psychology The author attempts to

confront the problems and ambiguities which exist in the programme as it now stands **The Structure of Social Theory** Anthony King, 2004-08-02 Drawing on the work of Gadamer the book demonstrates that a sociology which focuses on social relations does not imply a return to idealism nor a retreat into individualism nor a rejection of critique Rather a hermeneutic sociology which prioritises human social relations is the only coherent paradigm which is available today The author argues that sociologists studying the dramatic social transformations which are currently occurring should focus on social relations between humans they should not attempt to understand contemporary changes in terms of structure and agency
