Structures that Changed the Way the World Looked Donna Singer, 1994 20 Events is an exciting new series that presents brief accounts of the people and events that have had a major effect on history Each title contains 20 separate topics that illuminated an historical period a category of persons or a series of similar events The books are arranged to introduce readers to the concept of cause and effect and the relationship of the past to the present

An Analysis of Thomas Kuhn's The Structure of Scientific Revolutions Jo Hedesan, Joseph Tendler, 2017-07-05 Thomas Kuhn's *The Structure of Scientific Revolutions* can be seen without exaggeration as a landmark text in intellectual history In his analysis of shifts in scientific thinking Kuhn questioned the prevailing view that science was an unbroken progression towards the truth Progress was actually made he argued via paradigm shifts meaning that evidence that existing scientific models are flawed slowly accumulates in the face at first of opposition and doubt until it finally results in a crisis that forces the development of a new model This development in turn produces a period of rapid change extraordinary science Kuhn terms it before an eventual return to normal science begins the process whereby the whole cycle eventually repeats itself This portrayal of science as the product of successive revolutions was the product of rigorous but imaginative critical thinking It was at odds with science's self image as a set of disciplines that constantly evolve and progress via the process of building on existing knowledge Kuhn's highly creative re-imagining of that image has proved enduringly influential and is the direct product of the author's ability to produce a novel explanation for existing evidence and to redefine issues so as to see them in new ways

Performing Social Change on the Island of Ireland Ciara L. Murphy, 2023-05-22 This book examines the relationship between moments of significant social change on the island of Ireland and performance practice during the twentieth and twenty first centuries It examines how moments of significant change influence not only the content of performance practice but also the form and function of theatre production and reception This book

investigates how the Troubles and subsequent Peace Process Second Wave Feminism the Celtic Tiger and neoliberalism social revolution and the COVID 19 pandemic impacts the form and function of performance practice across the island of Ireland Although these forms of theatre and performance making refer to varied and distinct lineages of practice internationally there are key parallels that compel a study of their inter relationality in a specific Irish context This book explores how the performance of Ireland illuminates histories and stories that are on the margins illuminating the lived realities of everyday life through the presentation of moments of violence oppression and trauma as something that is as important as the larger narratives often ascribed to nationhood This book asks how performance practice engages with and informs moments of major social change on the island of Ireland through the distinct yet intersecting lenses of place performance form and social context over the course of almost a century of Irish theatre and performance practice
