A History of Stringed Keyboard Instruments Stewart Pollens, 2022-04-21 This book explores the history of keyboard instruments from their fourteenth century origins to the development of the modern piano It reveals the principles of their design and describes structural and mechanical developments through the medieval and renaissance periods and eighteenth and nineteenth centuries as well as the early music revival Stewart Pollens identifies and describes the types of keyboard instruments played by major composers and virtuosi through the ages and provides the reader with detailed instructions on their regulating stringing tuning and voicing drawn from historical sources [Stringed Keyboard Instruments, 1440-1880](#)

century harpsichords with different numbers of registers and manuals were built a few double manual Italian harpsichords with two 8 registers and one 4 register were made from the middle of the 17th century Harpsichords with richer and fuller sound were also built later in the 18th century opening up a variety of possibilities for new repertoire Later the two manual concept was adapted to the piano and the Mo r piano as well as the hyperpiano represent a culmination in the evolution of keyboard instruments With the expansion of the keyboard s capabilities in the two manual harpsichord players were able to play technically challenging passages in a close position as well as give clarity to dynamic contrasts Composers composed a number of works in response to these innovations ranging from Fran ois Couperin s Pi ces de clavecin J S Bach s Clavier bung II and Goldberg Variations to Ligeti s Continuum This repertoire was written specifically for two manual harpsichords and requires great technical command of the instrument This project explores the history and the repertoire of double manual and other extended keyboard instruments and examines the significance of using such instruments in selected musical examples It also investigates repertoire that can be performed more effectively on a double manual keyboard instead of an ordinary piano due to textural issues overlapped passages and other technical demands
