## **Structural Economics:**

*Structural Economics* Faye Duchin, 1998 In all societies the main causes of environmental degradation are resource extraction and the generation of wastes by households and industries Realistic strategies for mitigating these impacts require an understanding of both the technologies by which resources are transformed into products and the lifestyle choices that shape household use of such products Structural Economics provides a framework for developing and evaluating such strategies It represents an important new approach to describing household lifestyles and technological choices the relationships between them and their impact on resource use and waste In this volume economist Faye Duchin provides for the first time an authoritative and comprehensive introduction to the field including its social as well as its technological dimensions The presentation is accessible to non specialists while also including a substantial amount of new research Duchin s primary achievement is to integrate a qualitatively rich understanding of technologies and lifestyles into a flexible quantitative framework grounded in established principles of input output economics and social accounting She uses tools and insights from areas as diverse as demography and market research to conceptualize and describe different categories of households and their lifestyles She also draws on the expertise of engineers and physical scientists to examine the potential for technological change The framework Duchin develops permits the rigorous and detailed analysis of specific scenarios for alternative technologies and changes in lifestyle The author uses the case of Indonesia for illustration and to refine new concepts by testing their relevance against factual information The new field of structural economics represents an important step forward in the effort to apply the power of science to solving the problems of modern societies This book should prove invaluable to students and scholars of economics sociology or anthropology as well as environmental scientists policymakers at all levels and anyone concerned with a practical interpretation of the elusive concept of sustainable development *New Structural Economics* Justin Yifu Lin, 2010 **New Structural Economics** Justin Y. Lin, 2017 As strategies for achieving sustainable growth in developing countries are re examined in light of the financial crisis it is critical to take into account structural change and its corollary industrial upgrading Economic literature has devoted a great deal of attention to the analysis of technological innovation but not enough to these equally important issues The new structural economics outlined in this paper suggests a framework to complement previous approaches in the search for sustainable growth strategies It takes the following into consideration First an economy s structure of factor endowments evolves from one stage of development to another Therefore the optimal industrial structure of a given economy will be different at different stages of development Each industrial structure requires corresponding infrastructure both hard and soft to facilitate its operations and transactions Second each stage of economic development is a point along the continuum from a low income agrarian economy to a high income industrialized economy not a dichotomy of two economic development stages poor versus rich or developing versus industrialized Industrial upgrading and infrastructure improvement targets in developing countries should

not necessarily draw from those that exist in high income countries Third at each given stage of development the market is the basic mechanism for effective resource allocation However economic development as a dynamic process requires industrial upgrading and corresponding improvements in hard and soft infrastructure at each stage Such upgrading entails large externalities to firms transaction costs and returns to capital investment Thus in addition to an effective market mechanism the government should play an active role in facilitating industrial upgrading and infrastructure improvements

*A Structuralist Theory of Economics* Adolfo García de la Sienra,2019-01-15 Economists have long grappled with the problem of how economic theories relate to empirical evidence how can abstract mathematized theories be used to produce empirical claims How are such theories applied to economic phenomena What does it mean to test economic theories This book introduces explains and develops a structural philosophy of economics which addresses these questions and provides a unifying philosophical logical basis for a general methodology of economics The book begins by introducing a rigorous view of the logical foundations and structure of scientific theories based upon the work of Alfred Tarski Patrick Suppes Karl Marx and others Using and combining their methods the book then goes on to reconstruct important economic theories including utility theory game theory Marxian economics Sraffian economic theory and econometrics proving all the main theorems and discussing the key claims and the empirical applicability of each theory Through these discussions this book presents in a systematic fashion a general philosophy of economics grounded in the structural view Offering rigorous formulations of important economic theories *A Structuralist Theory of Economics* will be invaluable to all readers interested in the logic philosophy and methodology of economics It will also appeal particularly to those interested in economic theory

**The Oxford Handbook of Africa and Economics: Context and concepts** Célestin Monga,Justin Yifu Lin,2015 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this lhandbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches

this volume explores examines and assesses economic thinking on Africa and Africa's contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists

**China's Aid, Trade and Investment to Africa** Wang Xinying,2022-09-30 Adopting perspectives from development economics and international relations this book researches the ongoing cooperation between China and African countries and the interactive system of China's aid trade and investment to and with Africa In reviewing the history and development of China Africa relations from the founding of the People's Republic to the new century this book analyses the achievements opportunities and challenges of the bilateral relationship and reflects on the public private partnership model in the context of international development assistance Coupled with experiences from the United States Japan and the EU in the field of foreign aid trade and investment as well as case studies from China the core chapters delve into China Africa cooperation in terms of aid trade and investment and proposes to build an interactive and coordinated mechanism of China's aid trade and investment in Africa The author argues that China Africa cooperation goes beyond reciprocal benefits offering a possible model for South South Cooperation and a potential model for balanced and sustainable development within the world economy This book will appeal to researchers students and policy makers interested in Chinese politics and foreign policy African politics international relations international diplomacy and the world economy

**Demystifying the World Economic Development** Justin Yifu Lin,Caihui Fu,2024-10-22 Taking the new structural economics as the theoretical tools this book obtains the maximum understanding of the history development current situation and trend of the change of world economic structure as well as China's role in its development and its underlying laws and policies analyzes the polarization between the rich and poor for countries worldwide and provides a way for them to achieve common prosperity The world is going through a new round of major transformation Profound adjustment has been made in international economy science culture security and politics and the international development environment is undergoing profound changes In this context this book profoundly and systematically explains the underlying economic transition logic of world development and the general trend of China's relationship with the world and presents the entire process of world economic development Readers who pay close attention to the development of the world economy China's economic development and China's role in the world economy will find this book very fascinating
