

TEXTUAL ANALYSIS

Textual analysis is a method used to interpret and understand written or spoken language to gain an understanding of meanings produced through text.

OVERVIEW

Textual analysis involves examining the structure, content, and context of a text to uncover its underlying meanings, themes, and patterns. This process typically involves identifying key ideas, analyzing the rhetorical strategies employed, and considering the cultural, historical, and social factors that may have influenced the text's creation.

EXAMPLE

- **Analysis of policy documents:** A scholar could analyze the policy documents of public companies to determine the evolving ways in which they approach, define, and prioritize Environmental and Social Responsibility as a key value of the companies. This could involve methods like thematic coding and word frequency analysis.

Text Analysis Pipelines Henning Wachsmuth, 2015-12-02 This monograph proposes a comprehensive and fully automatic approach to designing text analysis pipelines for arbitrary information needs that are optimal in terms of run time efficiency and that robustly mine relevant information from text of any kind Based on state of the art techniques from machine learning and other areas of artificial intelligence novel pipeline construction and execution algorithms are developed and implemented in prototypical software Formal analyses of the algorithms and extensive empirical experiments underline that the proposed approach represents an essential step towards the ad hoc use of text mining in web search and big data analytics Both web search and big data analytics aim to fulfill peoples needs for information in an adhoc manner The information sought for is often hidden in large amounts of natural language text Instead of simply returning links to potentially relevant texts leading search and analytics engines have started to directly mine relevant information from the texts To this end they execute text analysis pipelines that may consist of several complex information extraction and text classification stages Due to practical requirements of efficiency and robustness however the use of text mining has so far been limited to anticipated information needs that can be fulfilled with rather simple manually constructed pipelines
