The Source of Human Hood Henry N. Wieman,1946 **The Transcendence of God** Edward Farley,2017-06-28 In the varying perspectives of theological thought the contrasting ideas of transcendence and immanence must inevitably be looked at together To whatever extent they are held to be mutually compatible or mutually exclusive neither can be considered without at least some cognizance being taken of the other Nevertheless in the swinging of the pendulum from era to era first one and then the other theme receives the greater weight of attention Thus nineteenth century liberalism placed more emphasis on immanence whereas the twentieth century revolt against liberalism has concentrated on transcendence In this book the author studies the transcendent aspect of God as developed by five contemporary theologians Two of the men whose work Dr Farley examines Reinhold Niebuhr and Paul Tillich are thoroughly familiar The other three Karl Heim Charles Hartshorne and Henry Nelson Wieman have received less attention in recent studies The five represent widely divergent traditions but all of them agree in opposing immanentism Moreover they all deal with the tension between the philosophical and the Biblical affirmations of God s transcendence and attempt to show in their respective ways how these types of beyondness are related

The Source of Human Good, By Henry N. Wieman Henry Nelson Wieman,1946 **Aristotle on the Sources of the Ethical Life** Sylvia Berryman,2019-03-13 Aristotle on the Sources of the Ethical Life challenges the common belief that Aristotle s ethics is founded on an appeal to human nature an appeal that is thought to be intended to provide both substantive ethical advice and justification for the demands of ethics Sylvia Berryman argues that this is not Aristotle s intent while resisting the view that Aristotle was blind to questions of the source or justification of his ethical views She interprets Aristotle s views as a middle way between the metaphysical grounding offered by Platonists and the scepticism or subjectivist alternatives articulated by others The commitments implicit in the nature of action figure prominently in this account Aristotle reinterprets Socrates famous paradox that no one does evil willingly taking it to mean that a commitment to pursuing the good is implicit in the very nature of action
