**Supranationalism in the New World Order** P. Close,E. Ohki-Close,1999-01-29 In the post Cold War New World Order the European Union EU is among a growing number of regional regimes that are acquiring prominent roles in the process of global governance The EU is the most advanced and influential regional regime by virtue of being constructed around the supranational European Community EC However the evident competitive advantages of supranationalism will foster the consolidation and proliferation of supranational regional regimes in a manner consistent with the neo functionalist understanding of such organisations      All Under Heaven Tingyang Zhao,2021-06-29 In this succinct yet ample work Zhao Tingyang as one of China s most distinguished and respected intellectuals provides a profoundly original philosophical interpretation of China s story Over the past few decades the question where did China come from has absorbed the thoughts of many of China s best historians Zhao keenly aware of the persistent and pernicious asymmetry in the prevailing way scholars have gone about theorizing China according to Western concepts and categories has tasked both Chinese and Western scholars alike to rethink China To this end Zhao introduces what he terms a distinctively Chinese centripetal whirlpool model of world order to interpret the historical progression of China s All Under Heaven Tianxia identity construction on the central plain of China In this book Zhao forwards a novel and compelling thesis on not only how we
