

Most of the people on the Earth were being badly behaved so God decided to send a Flood that would wipe out evil.

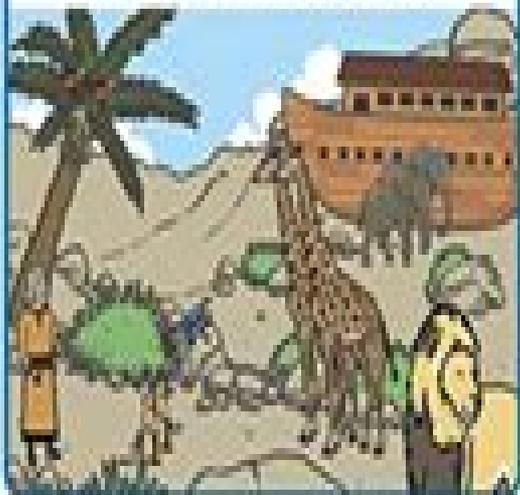

However, there was one good man on Earth. His name was Noah, and God trusted him.

God decided that He would save Noah by telling him that the Flood was coming. He asked Noah to build a really big boat called an ark.

When Noah had built the ark, God told him to put two of every animal on the Earth in it, both male and female.

His family, and the animals were all safely on the ark, when it rained for forty days and nights.

It flooded the Earth. Every living thing on the Face of the Earth died except for Noah, his family, and the animals who were safe in the ark.

The sun came out, the waters started to dry up, and it was time to start on a new planet. Noah sent out a dove to find dry land, but it came straight back.

Cohen,Julian Yates,2023-06-13 A timely rethinking of the archetypal story of Noah the great flood and who was left behind as the waters rose Most people know the

story of Noah from a children's bible or a play set with a colorful ship bearded Noah pairs of animals and an uncomplicated vision of survival Noah's ark however will forever be haunted by what it leaves to the rising waters so that the world can begin again In Noah's Arkive Jeffrey J Cohen and Julian Yates examine the long history of imagining endurance against climate catastrophe as well as alternative ways of creating refuge They trace how the elements of the flood narrative were elaborated in medieval and early modern art text and music and now shape writing and thinking during the current age of anthropogenic climate change Arguing that the biblical ark may well be the worst possible exemplar of human behavior the chapters draw on a range of sources from the Epic of Gilgamesh and Ovid's tale of Deucalion and Pyrrha to speculative fiction climate fiction and stories and art dwelling with environmental catastrophe Noah's Arkive uncovers the startling afterlife of the Genesis narrative written from the perspective of Noah's wife and family the animals on the ark and those excluded and so left behind to die This book of recovered stories speaks eloquently to the ethical and political burdens of living through the Anthropocene Following a climate change narrative across the millennia Noah's Arkive surveys the long history of dwelling with the consequences of choosing only a few to survive in order to start the world over It is an intriguing meditation on how the story of the ark can frame how we think about environmental catastrophe and refuge conservation and exclusion offering hope for a better future by heeding what we know from the past

How to Teach Reading Frances Jenkins, 1913

Reading Genesis after Darwin Stephen C Barton, David Wilkinson, 2009-11-11 Charles Darwin's *On the Origin of Species* has changed the landscape of religious thought in many ways There is a widespread assumption that before Darwin all Christians believed that the world was created some 6 000 years ago over a period of 6 days After Darwin the first chapters of Genesis were either rejected totally by skeptics or defended vehemently in scientific creationism This book tells a very different story Bringing together contributions from biblical scholars historians and contemporary theologians it is demonstrated that both Jewish and Christian scholars read Genesis in a non literal way long before Darwin Even during the nineteenth century there was a wide range of responses from religious believers towards evolution many of them very positive Stephen C Barton and David Wilkinson argue that being receptive to the continuing relevance of Genesis today regarding questions of gender cosmology and the environment is a lively option
