Handbook of the History of General Topology C.E. Aull,R. Lowen,2013-04-18 This book is the first one of a work in several volumes treating the history of the development of topology The work contains papers which can be classified into 4 main areas Thus there are contributions dealing with the life and work of individual topologists with specific schools of topology with research in topology in various countries and with the development of topology in different periods The work is not restricted to topology in the strictest sense but also deals with applications and generalisations in a broad sense Thus it also treats e g categorical topology interactions with functional analysis convergence spaces and uniform spaces Written by specialists in the field it contains a wealth of information which is not available anywhere else **Some Characterizations of Souslin's Problem** Frances Elizabeth Blount,1971 **Constructibility** Keith J. Devlin,2017-03-16 Since their inception the Perspectives in Logic and Lecture Notes in Logic series have published seminal works by leading logicians Many of the original books in the series have been unavailable for years but they are now in print once again In this volume the sixth publication in the Perspectives in Logic series Keith J Devlin gives a comprehensive account of the theory of constructible sets at an advanced level The book provides complete coverage of the theory itself rather than the many and diverse applications of constructibility theory although applications are used to motivate and illustrate the theory The book is divided into two parts Part I Elementary Theory deals with the classical definition of the L hierarchy of constructible sets and may be used as the basis of a graduate course on constructibility theory and Part II Advanced Theory deals with the J hierarchy and the Jensen fine structure theory **General Topology** Stephen Willard,2012-07-12 Among the best available reference introductions to general topology this volume is appropriate for advanced undergraduate and beginning graduate students

SET THEORY Lev D. Beklemishev,2000-04-01 SET THEORY **Kurt Gödel: Results on Foundations** Maria Hämeen-Anttila,Jan von Plato,2023-07-17 Kurt G del 1906 1978 gained world wide fame by his incompleteness theorem of 1931 Later he set as his aim to solve what are known as Hilbert s first and second problems namely Cantor s continuum hypothesis about the cardinality of real numbers and secondly the consistency of the theory of real numbers and functions By 1940 he was halfway through the first problem in what was his last published result in logic and foundations His intense attempts thereafter at solving these two problems have remained behind the veil of a forgotten German shorthand he used in all of his writing Results on Foundations is a set of four shorthand notebooks written in 1940 42 that collect results G del considered finished Its main topic is set theory in which G del anticipated several decades of development Secondly G del completed his 1933 program of establishing the connections between intuitionistic and modal logic by methods and results that today are at the same time new and 80 years old The present edition of G del s four notebooks encompasses the 368 numbered pages and 126 numbered theorems of the Results on Foundations together with a list of 74 problems on set theory G del prepared in 1946 and a list of an unknown date titled The grand program of my research in ca hundred questions
