String Indexing:

Image Databases and Multi-media Search Arnold W. M. Smeulders, Ramesh Jain, 1997 The World Wide Web and the Internet are signs things will be very different in the future And what is so striking about this computer age future is that it comes incredibly fast and is incredibly overwhelming Anyone who has surfed the Web has exclaimed at one point or another that there is so much information available so much to search and so much to keep up with Where Lycos and Alta Vista are already accepted tools for textual information image databases and multimedia search engines are the natural answers in the quest for pictorial information This book provides a state of the art description of that field It contains the proceedings of a valuable workshop in Amsterdam where people gathered to discuss the progress in the field The topics cover computational methods of searching for pictures the powerful pictorial clues in the recognition of objects storage and indexing of objects in a database and ways to access the requested pictorial information

Genomics Data Analysis for Crop Improvement Priyanka Anjoy, Kuldeep Kumar, Girish Chandra, Kishor Gaikwad, 2024-01-09 This book addresses complex problems associated with crop improvement programs using a wide range of programming solutions for genomics data handling and sustainable agriculture It describes important concepts in genomics data analysis and sequence based mapping approaches along with references The book contains 16 chapters on recent developments in several methods of genomic data analysis for crop improvements and sustainable agriculture all authored by eminent researchers who are experts in their fields These chapters focus on applications of a wide range of key bioinformatics topics including assembly annotation and visualization of next generation sequencing NGS data expression profiles of coding and noncoding RNA statistical and quantitative genetics trait based association analysis quantitative trait loci QTL mapping and artificial intelligence in genomic studies Real examples and case studies in the book will come in handy when applying the techniques The relative scarcity of reference materials covering bioinformatics applications as compared with the readily available books also enhances the utility of this book The targeted readers of the book are scientists researchers and bioinformaticians from genomics and advanced breeding in different areas The book will appeal to the applied researchers engaged in crop improvements and sustainable agriculture by using bioinformatics tools students research project leaders and practitioners from the various marginal disciplines and interdisciplinary research

[The Ruby Programming Language](#) David Flanagan, Yukihiro Matsumoto, 2008-01-25 The Ruby

Programming Language is the authoritative guide to Ruby and provides comprehensive coverage of versions 1.8 and 1.9 of the language. It was written and illustrated by an all-star team: David Flanagan, bestselling author of programming language bibles including JavaScript: The Definitive Guide and Java in a Nutshell, and committer to the Ruby Subversion repository; Yukihiro Matz, creator, designer, and lead developer of Ruby and author of Ruby in a Nutshell, which has been expanded and revised to become this book; why the lucky stiff, artist and Ruby programmer extraordinaire. This book begins with a quick start tutorial to the language and then explains the language in detail from the bottom up, from lexical and syntactic structure to datatypes to expressions and statements and on through methods, blocks, lambdas, closures, classes, and modules. The book also includes a long and thorough introduction to the rich API of the Ruby platform, demonstrating with heavily commented example code Ruby's facilities for text processing, numeric manipulation, collections, input/output, networking, and concurrency. An entire chapter is devoted to Ruby's metaprogramming capabilities. The Ruby Programming Language documents the Ruby language definitively but without the formality of a language specification. It is written for experienced programmers who are new to Ruby and for current Ruby programmers who want to challenge their understanding and increase their mastery of the language.

Enterprise Information Systems VII Chin-Sheng Chen, Joaquim Filipe, Isabel Seruca, José Cordeiro, 2007-09-20. This book contains the best papers of the Seventh International Conference on Enterprise Information Systems (ICEIS 2005) held in Miami, USA, and organized by INSTICC (Institute for Systems and Technologies of Information, Communication, and Control) in collaboration with FLORIDA INTERNATIONAL UNIVERSITY, who hosted the event. Following the route started in 1999, ICEIS has become a major point of contact between research scientists, engineers, and practitioners on the area of business applications of information systems. This conference, which is now one of the largest annual conferences in the Information Systems area, has received an increased interest every year, especially from the international academic community. This year, five simultaneous tracks were held, covering different aspects related to enterprise computing, including Databases and Information Systems, Integration, Artificial Intelligence, and Decision Support Systems, Information Systems Analysis and Specification, Software Agents, and Internet Computing and Human-Computer Interaction. The sections of this book reflect the conference tracks. ICEIS 2005 received 459 paper submissions from 41 different countries in all continents; 89 papers were published and orally presented as full papers (i.e., completed work); 110 position papers reflecting work in progress were accepted for short presentation, and another 90 for poster presentation. These numbers, leading to a full paper acceptance ratio below 20%, show the intention of preserving a high-quality forum.
