The Evolution of Consciousness Robert Evan Ornstein, 1991 1 I S Probes the evolutionary path of the human mind and the way we use it On Booklist s Editors Choice list for 1991 *A Mind So Rare* Merlin Donald, 2002 Donald psychology Queen s University Canada challenges the prevailing view that seeks to explain away human consciousness and presents a theory on the origins of the modern mind He describes the cultural and neuronal forces that power human modes of awareness and proposes that the human mind is a hybrid product of the interweaving of the brain with an invisible symbolic web of culture to form a distributed cognitive network Using evidence from brain and behavioral studies of humans and animals he explains how an expansion of consciousness transcends the limitations of the mammalian mind and elaborates the foundations of self evaluation and self reflection c Book News Inc **The Evolution of Consciousness** Leonard Hall, 2015-06-25 Excerpt from *The Evolution of Consciousness* In the following pages I have attempted to trace the evolution of consciousness from the simplest kind of consciousness manifested in animal life to the complex consciousness of man The only kinds of human consciousness which are here excluded from consideration are deductive reasoning and some of the higher emotions It is hoped to take up these subjects or at least the former of them in a future publication An introductory chapter is devoted to a brief consideration of a theory of the nature of man which I have propounded more fully elsewhere It may be as well to state however that the reasoning in the subsequent chapters although it touches on this theory here and there in one or two minor points is for the most part independent of it About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Evolution of Consciousness** Bjørn Grinde, 2016-09-27 This book gives the reader an understanding of what consciousness is about and of how to make conscious experiences more pleasant It expands on a new theory that describes the evolutionary trajectory leading to conscious life forms In short the evidence suggests that consciousness first evolved some 300 million years ago as a consequence of the introduction of feelings Feelings offer a strategy for making behavioural decisions Besides playing a crucial role in the evolution of the human mind they are a key factor in regard to mental health and quality of life Fortunately the human brain is plastic By exploiting available options for modulating the mind it is therefore possible to impact on what sort of experiences the brain serves More specifically you can strengthen the capacity for positive feelings and reduce the sway of negative feelings The text covers biological neurological psychological and philosophical aspects of the mind The Evolution of Human Consciousness John Hurrell Crook, 1980 Crook has an extensive range of interests and writes with

authority on the whole sociobiological spectrum He discusses the behavior of insects birds primates and so forth with impressive thoroughness and detail He introduces an equally expert and apparently firsthand discussion of Eastern philosophy especially Zen Buddhism His purpose is to emphasize the duality or perhaps multiplicity of consciousness and the importance of society's more objective facets A scholarly work complete with excellent bibliographies index and references

Choice **The Evolution of Consciousness** Paula Droege,2021-12-02 The Evolution of Consciousness brings together interdisciplinary insights from philosophy neuroscience psychology and cognitive science to explain consciousness in terms of the biological function that grounds it in the physical world Drawing on the novel analogy of a house of cards Paula Droege pieces together various conceptual questions and shows how they rest on each other to form a coherent structured argument She asserts that the mind is composed of unconscious sensory and cognitive representations which become conscious when they are selected and coordinated into a representation of the present moment This temporal representation theory deftly bridges the gap between mind and body by highlighting that physical systems are conscious when they can respond flexibly to actions in the present With examples from evolution animal cognition introspection and the free will debate this is a compelling and animated account of the possible explanations of consciousness offering answers to the conceptual question of how consciousness can be considered a cognitive process The Evolution of Human Conscience Ralph A.

Gandhi,1986 **Cosmic Consciousness** Richard Maurice Bucke,1991-10-05 This classic study in the evolution of the human mind is a pioneering work as valuable today as when it was first published in 1901 At that time it was enthusiastically acclaimed by both William James and P D Ouspensky It has long been accepted as a landmark in the field of mysticism In reviewing the mental and spiritual activity of the human race Dr Bucke discovers that at intervals certain individuals have appeared who are gifted with the power of transcendent realization or Illumination Their experiences constitute a definite

advance in man's relation with the Infinite. Moreover, the author shows from available records that this transfiguring endowment of Illumination is on the increase and he gives full details of practically all the cases on record up to the time when the book was written.
