Transformable House:

The Transformable House Jonathan Bell, Sally Godwin, 2000-12-27 For modern architects experimentation with space and the house plan provides the most fertile area of innovation allowing them to push established boundaries and question received conventions in domestic design As we enter the 21st century the incorporation of greater flexibility into housing has become a matter of urgency The traditional notion of the family unit is being exploded Small domestic groupings have become dispersed with the fragmentation of families and more people choosing to live alone At the same time the pressure put on space by multiple marriages and extended families means that the requirements for our home are never still as they constantly expand and contract The conventional layout for suburban housing can no longer sustain or cater for changing social needs This Architectural Design title fully explores the concept of transformability in house design Through a set of introductory essays by Iain Borden Catherine Croft James Gallie Dennis Sharp Stefan Muthesius and Miles Glendinning the roots of this phenomenon are examined in 20th century design It is however through the eleven case studies of contemporary architects projects that the concept of transformability is stretched to its full It is revealed to mean many things the integration of technology into the home the use of modular systems to facilitate construction and planning and the development of complex devices for modifying and customising architectural space on a day to day basis *Flexible Housing* Jeremy Till, Tatjana Schneider, 2016-09-19 Flexible housing is housing that can adjust to the changing needs of the user and accommodate new technologies as they emerge *Flexible Housing* by Jeremy Till and Tatjana Schneider examines the past present and future of this important subject through over 160 international examples Specially commissioned plans printed to scale together with over 200 illustrations and diagrams provide fascinating detail and allow direct visual comparisons to be made Combining history theory and design the book explains the social and economic benefits that can be achieved and shows the various ways it has been and can be delivered The book ends with an accessible guide to how flexible housing might be designed and constructed today to achieve adaptable and ultimately sustainable buildings Housing designers housing managers and students of architecture construction and housing will find this book of immense value both as a comprehensive reference and design manual House Cathy Lang Ho, Raul A. Barreneche, 2001 The idea and function image and built reality of the house vary from culture to culture locale to locale generation to generation demographic to demographic Houses do much more than provide a roof over our heads They are sanctuaries havens our private kingdoms our personalized cocoons They are backdrops to our everyday lives They are status symbols They are economic indicators For architects they are dream jobs test beds manifestos Only by understanding the predominant reality of and the prevailing attitudes toward the house can we appreciate the great leaps and changes it is and always has been undergoing The houses in this book represent new ideas about how to build houses how they are rooted and root us to their locale and how we use and regard them The first chapter Tectonics features houses that explore the novel application of materials and building

techniques in the domestic realm Next Context showcases houses that actively engage in their site drawing inspiration whether in texture form or topography from their surrounding landscape Lastly Revolutions addresses the significant shifts our lifestyles have undergone and how the house responded to them House features twenty recently built houses that have been designed by some of today s leading architects including Steven Holl Toshiko Mori Alberto Kalach and Rick Joy By leading readers to the cutting edge of today s architecture authors Ho and Barreneche relate today s building trends and hint at what awaits us in the future Featuring more than 200 color photographs and plans House is the perfect book for house enthusiasts worldwide

Grace and Gravity Lars Spuybroek,2020-11-26 How do we live well The first sentence of Grace and Gravity raises the fundamental question that constantly occupies our minds and of all those who lived before us Paradoxically the impossibility of answering this question opens up the very room needed to find ways of living well It is the gap where all disciplines fall short where architecture does not fit its inhabitants where economy is not based on shortage where religion cannot be explained by its followers and where technology works far beyond its own principles According to Lars Spuybroek the prize winning former architect this marks the point where the paradoxical machine of grace reveals its powers a point where we cannot say if we are moving or being moved Following the trail of grace leads him to a new form of analysis that transcends the age old opposition between appearances and technology Linking up a dazzling and often delightful variety of sources monkeys paintings lamp posts octopuses tattoos bleeding fingers rose windows robots smart phones spirits saints and fossils with profound meditations on living death consciousness and existence Grace and Gravity offers an eye opening provocation to a wide range of art historians architects theologians anthropologists artists media theorists and philosophers

The Builder ,1918 Minimalism DesignSource Encarna Castillo,2004-09-28 The term Minimalism has not always been used in a favorable sense especially in architecture and even today it may be the cause of some confusion and ambiguity The problem comes from the word s use in defining a creative current school or trend when in fact it refers to an aesthetic At the same time this aesthetic is not chronologically well defined either and moreover interacts with different disciplines This explains why we find minimalist buildings in periods very far apart from each other and in architects as different as Tadao Ando Eduardo Souto de Moura Jacques Herzog Pierre de Meuron or Luis Barrag n among others Minimalism DesignSource
