Cox,1986 Software Engineering Anthropology and Historiography of Science Debi Prasad Chattopadhyaya,1990 Whether history or anthropology is the most fundamental social science remains still a controversial and undecided issue For a proper understanding of this instructive controversy the presuppositions of these two disciplines need to be critically and philosophically reviewed Otherwise the true perspective of the controversy remains undisclosed and therefore unintelligible A close and comprehensive understanding of language as the basic form of the life world provides the cues necessary to show correctly the complementary relation between anthropology and history That synchronic or sociological and diachronic or historical perspectives of science are mutually supportive ways of representing the same social activities has been persuasively argued in this book Chattopadhyaya has pointedly examined in this connection the conflicting views of Sartre and Levi Strauss Also he has selectively drawn upon critically assessed and brought the theories of Husserl Heidegger Popper Quine and Kuhn to bear upon the problem The author s conclusion centers around his own concept of human universals The positive thesis of the book rejects the trichotomy of three cultures scientific humanistic and technological That this view is not a theoretical creature but a historical and cultural finding has been plausibly reasoned by Chattopadhyaya The main trend of his reasoning clearly shows that the gulf between analytic philosophers and phenomenologists is either

imaginary or highly exaggerated In this specific case the author a student of Popper perceptively argues to the effect that if theorizations is primarily problem oriented rather than school based one can see one's way to rational solution in the convergent light of different but affine human or cultural origins But his presentation and assessment of the views and arguments of Husserl Popper Quine and Kuhn are likely to prove controversial **Philosophical Magazine** ,1895
