**The Flâneur Abroad** Richard Wrigley,2014-10-17 This volume offers new perspectives on a crucial figure of nineteenth century cultural history the fl neur Recent writing on the fl neur has given little sustained attention to the widespread adaptation of the fl neur outside Paris let alone outside France and indeed Europe whether in the form of historic antecedents modern sequels or contemporary echoes Yet it is clear that the allure of the fl neur s persona has led to its translation and adoption far beyond Parisian boulevards and passages and this in different media and literary genres This volume maps some of the fl neur s travels and transpositions How far the fl neur is dependent on Paris as a milieu is opened up for questioning for all the international dispersal of this idea and model in some sense Paris is always present if only as a reference to kick against or replace When modern fl neurs step out in foreign cities how much of a Parisian ethos clings to them however they might claim independence Cities which provide counterpoints to Paris discussed here are Amsterdam Brussels Dublin Le Havre London Madrid New York Prague and St Petersburg This internationalised view also reconsiders the nature of the fl neur and revises stereotypes based on Walter Benjamin s account of Baudelaire Another key feature is the chapters which analyse the fl neur in terms of visual representations whether graphic illustration streetscapes urban design cinema or album covers related to musical examples from the 1950s to the present

**Visualising the Unseen, Imagining the Unknown, Perfecting the Natural** Andrew Graciano, 2008 Throughout history both art and science have been employed to visualise things unseen and to image imagine things unknown as part of the quest to understand nature In light of this perhaps our contemporary tendency to see art and science as completely divergent mutually exclusive fields of study with similarly distinct methodologies may be profitably re-examined This volume brings together recent work by both junior and senior scholars treating the art-science connection in eighteenth and nineteenth century art The essays are individual case studies dealing with historical interconnections between drawing painting sculpture and book illustration and such diverse fields of science as botany physics geology and evolutionary biology As a whole the book invites readers to question more generally What is art s relationship to science and vice versa At what points do the two disciplines intersect and/or complement one another Can science directly inform artistic subjects Is art a useful tool to focus a scientific lens on the past to validate or challenge scientific theory to inspire and encourage scientific inquiry Can it be employed successfully as a means to visualise scientific ends Do artists have the potential to create images and objects whose meanings surpass the laws of science and

outlast its theories whose functions are similarly universal and arguably more immediately accessible legible to the public If art like text and data charts has the power to create organise and disseminate information knowledge then why do we continue to privilege scientific research over artistic investigation Would it not be more fruitful and humane to see them as more equitable modes of inquiry
