Educational Media Index.[Complete Series] ,1964      *The Stars in Our Pockets* Howard Axelrod,2020-01-14 Beautiful elegantly expressed meditations on the inner climate change we experience as we shift between our offline and online lives for fans of Oliver Sacks and David Foster Wallace s *This Is Water* New York Review of Books What shapes our sense of place our sense of time and our memory How is technology changing the way we make sense of the world and of ourselves Our screens offer us connection especially now in the wake of the COVID 19 pandemic but there are certain depths of connection our screens can t offer to ourselves to the natural world and to each other In this personal exploration of digital life s impact on how we see the world Howard Axelrod marshals science philosophy art criticism pop culture and his own experience of returning from two years of living in solitude in northern Vermont *The Stars in Our Pockets* is a timely reminder of the world around us and the worlds within us and how as alienated as we may sometimes feel they were made for each other

**Statistical Challenges in Astronomy** Eric D. Feigelson,Jogesh Babu,2006-05-26 Digital sky surveys high precision astrometry from satellite data deep space data from orbiting telescopes and the like have all increased the quantity and quality of astronomical data by orders of magnitude per year for several years Making sense of this wealth of data requires sophisticated statistical techniques Fortunately statistical methodologies have similarly made great strides in recent years Powerful synergies thus emerge when astronomers and statisticians join in examining astrostatistical problems and approaches The book begins with an historical overview and tutorial articles on basic cosmology for statisticians and the principles of Bayesian analysis for astronomers As in earlier volumes in this series research contributions discussing topics in one field are joined with commentary from scholars in the other Thus for example an overview of Bayesian methods for Poissonian data is joined by discussions of planning astronomical observations with optimal efficiency and nested models to deal with instrumental effects The principal theme for the volume is the statistical methods needed to model fundamental characteristics of the early universe on its largest scales      **West's Great Ideas for Teaching Astronomy** Karl F.

information on the multidisciplinary influences of volcanic eruptions both the destructive as well as the beneficial aspects. The majority of the chapters focus on the geoscience related aspects of volcanism: radioactive heat source, melting, rock ascent, magma surface phenomena associated with exiting magma, extraterrestrial volcanism, etc. In addition, complementary chapters discuss the multidisciplinary aspects of volcanism: these include the history of volcanology, geothermal energy resources, interaction with the oceans and atmosphere, health aspects of volcanism, mitigation of volcanic disasters, post eruption ecology, and the impact of eruptions on organismal biodiversity. In addition to its appeal to educators, students, and professional and amateur scientists, the Encyclopedia of Volcanoes functions as an important information resource for administrators and officials responsible for developing and implementing volcanic hazard mitigation around the world. The first and only reference work to cover all aspects of volcanology. More than 80 separate peer reviewed articles, all original contributions by leading authors from major institutions of science around the world, commissioned for this work. An integrated transition from the volcanic process through hazards, risk, and societal impacts, with an emphasis on how volcanoes have influenced and shaped society. Convenient single volume format with topics arranged thematically. Articles provide coverage of nine different aspects of volcanology. Each entry in the Encyclopedia begins with an outline of the article content and a concise definition of the subject of the article. 3,000 Glossary entries explain key terms. Further Reading lists appear at the end of each entry. Extensive cross referencing system links related articles. Sixteen pages of color will convey the science and excitement of this often violent phenomena. Large 8 1/2 x 11 page size, easy to read, double column format.

The Atlantic Monthly, 1907     *Aeronautical Engineering Review*, 1957     **The Guide to High Definition Video Production** Clay Gordon, 1996. The REBO Guide to High Definition Video Production is the first and only book on high definition video to focus on production, not politics. It is a practical book about what it really takes to produce programming in high definition video, starting from the very earliest days of production, right on out to the most up to date techniques and equipment. Given the inevitability of the widescreen market, acceptance of some form of high resolution widescreen video transmission, film and video production professionals will find the book's emphasis on the real life issues involved in using high definition in film style and live multi camera productions invaluable in *Preparing for a Widescreen World*. The book is organized into sections based on the major components of a production, from Production through Post Production, Engineering, Creative Considerations, and includes the experiences, insights, and anecdotes of some of the most experienced High Definition producers, directors, DPs, and engineers in the world. The Guide was written to appeal to people with various levels of technical knowledge. It includes an introductory section on video technology, anecdotal, non technical case studies, and the hard core technical information that producers and engineers need to know to get their jobs done. REBO has led the way in field testing new equipment and ground breaking applications for all aspects of high definition video technology since 1986. The company remains the only independent concern in the world involved in every aspect of high definition, from production

post production and programming through education to research and applied technology development Each year REBO is recognized internationally by a diverse body of professionals for its achievements Accolades include the Prix du Court Metrage award for Best Fiction Short at the Cannes International Film Festival special recognition from NASA for the first high definition videotaping of the shuttle launch and for six straight years the highest awards at the International Electronic Cinema Festival in Montreux and Tokyo Clay Gordon is a twelve year veteran of computer graphics interactive media and video production industries He has undertaken a wide variety of research design development and writing projects for clients as diverse as IBM Interactive Digital Solutions AGFA Matrix AV Video Millimeter and Wired Astronomy ,1983
