The Creation Frame:

The Creation Frame Phyllis H. Thompson, 1973 **Frame Innovation** Kees Dorst, 2015-03-27 How organizations can use practices developed by expert designers to solve today's open complex dynamic and networked problems. When organizations apply old methods of problem solving to new kinds of problems they may accomplish only temporary fixes or some ineffectual tinkering around the edges. Today's problems are a new breed: open, complex, dynamic, and networked, and require a radically different response. In this book, Kees Dorst describes a new innovation-centered approach to problem solving in organizations: frame creation. It applies design thinking but goes beyond the borrowed tricks and techniques that usually characterize that term. Frame creation focuses not on the generation of solutions but on the ability to create new approaches to the problem situation itself. The strategies Dorst presents are drawn from the unique, sophisticated, multilayered practices of top designers and from insights that have emerged from fifty years of design research. Dorst describes the nine steps of the frame creation process and illustrates their application to real-world problems with a series of varied case studies. He maps innovative solutions that include rethinking a store layout so retail spaces encourage purchasing rather than stealing; applying the frame of a music festival to understand late-night problems of crime and congestion in a club district; and creative ways to attract young employees to a temporary staffing agency. Dorst provides tools and methods for implementing frame creation, offering not so much a how-to manual as a do-it-yourself handbook, a guide that will help practitioners develop their own approaches to problem solving and creating innovation.

In the Beginnings Steven E. Dill, 2010-05-21 In *In the Beginnings* is a defense of the biblical Gap Theory of Creation. This theory, once popular in the late 19th and early to mid-20th centuries, has been rejected by many modern-day creationists as being without biblical or scientific support. This book takes an in-depth look at both science and the Bible. Its purpose is to show how the Gap Theory better fits the scientific and biblical facts. More importantly, its main purpose is to reach out to unbelievers who think the Bible teaches things contrary to science. True scientific facts and true Biblical truths do not contradict. The basic assumption of the author is that God is smart enough and powerful enough and sovereign enough to make His Works and His Words agree. Because God reveals His invisible attributes in His handiwork, the author uses both God's Word and His work to share the Gospel of Jesus Christ. Dr. Steven Dill, once a staunch evolutionist, began investigating creationism after becoming aware of some scientific facts that seemed incompatible with his own beliefs. Taking the position that truth will stand the test, he began challenging even his own ideas about the origin of the universe. His conclusion was that true scientific facts and true Biblical truths do not contradict, and in this book, he presents a new look at an old theory that preserves the integrity of both science and the Bible. He earned his Bachelor's Degree in Biology in 1979 and his Doctorate of Veterinary Medicine in 1985 at the University of Missouri-Columbia. He is currently a practicing veterinarian in Jeffersonton, Kentucky, where he lives with his wife Linda and two dogs, Samwise Gamgee and Rosie Cotton. His two sons, Tom and James, have grown into fine young Christian men who make
