**Time and History in Denis Pétau** Johannes Zachhuber, 2025-11-17 This book offers the first comprehensive presentation and analysis of the innovative theory of time advanced by early modern French scholar Denis P tau Denis P tau 1583 1652 was the model of an early modern erudite Proudly Catholic the Jesuit scholar was a keen participant in the scientific and religious debates of his time In the 1620s and 30s he made major contributions to the burgeoning literature on scientific chronology responding especially to the work of Joseph Scaliger As part of this effort P tau developed a fascinating theory of time and history Societies inevitably exist in a temporal frame and therefore develop communal practices of timekeeping For this they adapt cosmic time to the needs and purposes of human societies They create calendars and arrange their historical records in chronological form This is a scientific task but since time is ultimately sacred reality its study has always been assigned to priests P tau therefore sees science and religion as intimately connected progressing jointly through history and culminating in his own time The book will be of interest to philosophers of time and historians of early modern science religion and theology

**Time** Joel Burges, Amy Elias, 2016-08-02 The critical condition and historical motivation behind Time Studies The concept of time in the post millennial age is undergoing a radical rethinking within the humanities Time A Vocabulary of the Present newly theorizes our experiences of time in relation to developments in post 1945 cultural theory and arts practices Wide ranging and theoretically provocative the volume introduces readers to cutting edge temporal conceptualizations and investigates what exactly constitutes the scope of time studies Featuring twenty essays that reveal what we talk about when we talk about time today especially in the areas of history measurement and culture each essay pairs two keywords to explore the tension and nuances between them from past future and anticipation unexpected to extinction adaptation and serial simultaneous Moving beyond the truisms of postmodernism the collection newly theorizes the meanings of temporality in relationship to aesthetic cultural technological and economic developments in the postwar period This book thus assumes that time not space as the postmoderns had it is central to the contemporary period and that through it we can come to terms with what contemporaneity can be for human beings caught up in the historical present In the end Time reveals that the present is a cultural matrix in which overlapping temporalities condition and compete for our attention Thus each pair of terms presents two temporalities yielding a generative account of the time or times in which we live
