Transnational Classes And International Relations:

Transnational Classes and International Relations Kees van der Pijl, 1998 Presenting an analysis of class formation in the global political economy this text studies the growth of an integrated transnational capitalist class from Freemasonry in the late 1800s to contemporary planning groups with a class orientation The Oxford Handbook of Global Studies Mark Juergensmeyer, Saskia Sassen, Manfred B. Steger (ed), 2019 Since the end of the Cold War globalization has been reshaping the modern world and an array of new scholarship has risen to make sense of it in its various transnational manifestations including economic social cultural ideological technological environmental and in new communications The chapters discuss various aspects in the field through a broad range of approaches This handbook focuses on global studies more than on the phenomenon of globalization itself although the various aspects of globalization are central to understanding how the field is currently being shaped

Ukraine and the Empire of Capital Yuliya Yurchenko, 2017-12-20 Since 1991 nominally independent Ukraine has been in turmoil with the Orange Revolution and the Maidan protests marking its most critical moments Now its borders are threatened and the civil unrest and armed conflict continue to destabilise the country In order to understand these dramatic events Yuliya Yurchenko looks to the country's post Soviet past in this ambitious analysis of contemporary Ukrainian political economy Providing distinctive and unexplored reflections on the origins of the conflict Yurchenko unpacks the four central myths that underlie Ukraine's post Soviet reality the myth of transition the myth of democracy the myth of two Ukraines and the myth of the other In doing so she sheds light on the current intensification of class rivalries in Ukraine the kleptocracy resource wars and analyses existing and potential dangers of the rightwing shift in Ukraine's polity stressing a historic opportunity for change Critiquing the concept of Ukraine as transition space she provides a sweeping analysis which includes the wider neoliberal restructuring of global political economy since the 1970s with particular focus on Ukraine's relations with the US the EU and Russia This is a book for those wanting to understand the current conflict as a dangerous product of neoliberalism of the empire of capital

Historical Materialism and Globalisation Mark Rupert, Hazel Smith, 2016-04-29 Now that Soviet style socialism has collapsed upon itself and liberal capitalism offers itself as the natural necessary and absolute condition of human social life on a worldwide scale this book insists that the potentially emancipatory resources of a renewed and perhaps reconstructed historical materialism are more relevant in today's world than ever before Rather than viewing global capitalism as an eluctable natural force these essays seek to show how a dialectic of power and resistance is at work in the contemporary global political economy producing and contesting new realities and creating conditions in which new forms of collective self determination become thinkable and materially possible It will be vital topical reading for anyone interested in international relations international political economy sociology and political theory

Approaches and Theory in International Relations Trevor Taylor, 1978 **A Reader in International Relations and Political Theory** Howard L. Williams, Tony Evans, Moorhead Wright, 1993 This

reader has been assembled in response to increasing dissatisfaction among a growing number of international relations scholars with the currently dominant theory of realism as well as in recognition of the large number of newly independent states which are having to write new constitutions and develop foreign relations. The book includes excerpts and essays from political theory and international relations which provide a starting point for further study of these subjects. It draws together writings representing two distinct traditions and demonstrates their interconnections. In political theory, excerpts are drawn from classical texts which have an important bearing on problems of international relations. In international relations, the collection includes essays which have had a seminal influence on the development of this discipline. The editors firmly believe that there is much to be learned from the interface between international relations and political theory and they argue that although regarded by some as two distinct fields, their subject matter is one: the nature of human conduct in a global context.

Gramsci and Global Politics Mark McNally, John Schwarzmantel, 2009-03-09. This book explains and assesses the relevance of the ideas of Gramsci. It takes his core concepts and uses them to analyse features of present day politics and assess the extent to which his ideas can aid the understanding of the contemporary political world.

Theories of International Relations: Approaches to international relations: structuralism Stephen Chan, Cerwyn Moore, 2006. Comprises 80 articles representing the most influential theoretical writings by international relations scholars. Introduced by an essay from Stephen Chan and Cerwyn Moore, the four thematically organised volumes cover the major traditions of IR theory. Together these four volumes provide broad coverage of the subject and historical depth.

The

Modern/Colonial/Capitalist World-System in the Twentieth Century Ramón Grosfoguel, Ana Margarita Cervantes-Rodríguez, 2002-07-30. Examines world system theory from the perspectives of global processes and antisystemic movements, feminist theory and the aftermath of the colonial system.

Political Economy and the Changing Global Order Richard Stubbs, Geoffrey R. D. Underhill, 2006. Covering the basics necessary for a course in international political economy, IPE. This text comes from a non-American critical perspective and the contributors are drawn from prominent scholars of IPE around the world.

Beyond the Regulation Approach Bob Jessop, Ngai-Ling Sum, 2006. This book presents a

detailed and critical account of the regulation approach in institutional and evolutionary economics Offering both a theoretical commentary and a range of empirical examples it identifies the successes and failures of the regulation approach as an explanatory theory and proposes new guidelines for its further development Although closely identified with heterodox French economists there are several schools of regulation theory and the approach has also been linked to many topics across the social sciences Bob Jessop and Ngai Ling Sum provide detailed criticisms of the various schools of the regulation approach and their empirical application and have developed new ways of integrating it into a more general critical exploration of contemporary capitalism The authors go on to describe how the regulation approach can be further developed as a progressive research paradigm in political economy Also presented is a detailed philosophical as well as theoretical critique of the regulation approach and its implications for the philosophy of social sciences and questions of historical analysis especially periodization Addressing the implications of the regulation approach for both the capitalist economy and the changing role of the state and governance this book will be of great interest to a wide ranging audience including institutional and evolutionary economists economic and political sociologists and social and political theorists **Capital & Class** ,2007 [Handbook of Research on Asian Business](#) Henry Wai-Chung Yeung,2007 The rise of Asia as an important region for global business has been widely recognized as one of the most significant economic phenomena in the new millennium This handbook brings together reviews of Asian business under a range of headings including business organization marketing and business policy
