# Third Encounter

**Yijin Wang**

### **Third Encounter:**

Sweetly Tempted Cassandra Kim, Flynn inherited his father's million pound chocolate business at 18 and is secretly gay. He's very far into the closet due to his upbringing and lives with two fears. One is that he will ruin his father's business and the other is that someone will work out that he is gay. Lucas, his new employee, is the opposite. He's openly gay and very flirty. Or rather, he constantly flirts with Flynn. As time passes, Flynn finds it harder to pretend that he's not gay and that he doesn't like Lucas as more than his best employee. He's also been plagued by dreams that seem to be from his childhood where he made a promise with someone who feels like Lucas. Lucas's problem is that Flynn doesn't remember him and doesn't feel he deserves to be happy. Lucas's mission is to make Flynn happy, but it's going to be a hard one. The King's Ships Halton Stirling Lecky, 1913

**Spacecraft that Explored the Inner Planets Venus and Mercury** Thomas Lund, 2023-07-03. A series of increasingly capable spacecraft were sent to explore the inner planets Venus and Mercury. The history of that planetary exploration is traced in this book along with the evolution of sophisticated spacecraft that unveiled long-sought secrets of the planets. The spacecraft were ingenious and reflected the best efforts of talented people working with the available technology of the day. Additionally, this book showcases engineering involved in those capable machines. A consecutive series of 34 planetary spacecraft which span the time period 1961 to 2021 are described. This includes the unsuccessful missions of several early spacecraft that paved the way for a better understanding of Venus's hostile environments. This book will describe many successful spacecraft sent to Venus by the Soviet Union and many successful spacecraft sent to Venus and to Mercury by the United States. The recent exploration of Venus by the European Space Agency's Venus Express and the Japanese spacecraft Akatsuki can also be found in this book. The author draws on over 50 years of experience on aircraft and spacecraft systems to tell the story of these planetary spacecraft. The spacecraft experience includes being the technical lead for the landing radars on the Surveyor and Apollo lunar landers as well as providing analyses for the rendezvous radar for the Space Shuttle. Practical engineering experience is augmented by Master's degrees in electrical engineering, physics, and business administration.

**Multisited** Kaushik Sunder Rajan, 2021-09-27. In *Multisited*, Kaushik Sunder Rajan evaluates the promises and potentials of multisited ethnography with regard to contemporary debates around decolonizing anthropology and the university. He observes that at the current moment, anthropology is increasingly peopled by diasporic students and researchers, all of whom are accountable to multiple communities beyond the discipline. In this light, Sunder Rajan draws on his pedagogical experience and dialogues to reconceptualize ethnography as a multisited practice of knowledge production, ethical interlocution, and political intervention. Such a multisited ethnography responds to contemporary anthropology's myriad commitments as it privileges attention to questions of scale, comparison, and the politics of ethnographic encounters. Foregrounding the conditions of possibility and difficulty for those doing and teaching ethnography.

in the twenty first century Sunder Rajan gestures toward an ethos and praxis of ethnography that would open new forms of engagement and research

*Exploring Mercury* Robert G. Strom, Ann L. Sprague, 2003-07-15 Strom Mercury How did Mercury get such an enormous iron core Why is its tectonic framework so different from any other planet or satellite What is its crystal composition Why is the crust so depleted in iron when the interior is so rich in that element What are the polar deposits Where do the elements in the exosphere come from Mercury is a planet shrouded in mystery Only 45 percent of its surface has been seen in any detail and that was from the Mariner 10 flyby in 1974 Yet what is known only makes the planet more fascinating New Earth based observations have shed light on surface and exosphere compositions and re evaluations of the Mariner 10 data using modern image processing techniques show evidence for volcanic flow fronts pyroclastics and other volcanic phenomena not seen before This ground breaking book not only chronicles what has been discovered but looks ahead to what has yet to emerge An accompanying CD contains all the best Mariner 10 images including the data for each image photomosaics and maps
