practices Covering topics such as soft skills transformational leadership and self leadership this premier reference source is an excellent resource for business executives and managers governmental and non governmental organization leaders students and educators of higher education librarians researchers and academicians Women in Leadership Positions in the People's Republic of China Maria Adnane,2020-06-02 Master s Thesis from the year 2012 in the subject Business economics Business Management Corporate Governance grade 1 7 Heilbronn University language English abstract Women are still significantly underrepresented in Top Management positions and leadership is still associated with the male gender as leadership theories traditionally focus on men This is especially evident in China which has one of the world s highest female labor participation but a female share of only eight percent on the corporate boards Although Chinese women s tertiary educational attainment is now equal to the tertiary education of Chinese men they still face many barriers on their way to the top The strong influence of Confucian values perceiving women as inferior to men remains noticeable until today and women find themselves exposed to a strongly patriarchal business environment As being traditionally the main care givers of their families they are deemed to be expensive potential mothers and thus gender preference can be observed second Classical leadership theories of the Western culture as well as of the Chinese culture are introduced to provide a common understanding of their approaches Further the situation of women in the past and of today is being compared as well as their leadership styles access to managerial leadership positions and the barriers they face Since educational attainment of both genders does not explain why women are rarely found on the upper managerial ranks other reasons that could be a barrier for women s career advancement are examined in this research Leadership Peter G. Northouse,2024-11-27 Now with a new chapter on Social Identity Leadership Adopted in thousands of courses in 89 countries and translated into 15 different languages this market leading text successfully combines an academically robust account of the major theories and models of leadership with an accessible style and focus on how leadership theory can inform leadership practice Peter G Northouse uses a consistent structure for each chapter allowing readers to easily compare and contrast different theories Case studies and questionnaires provide students with practical examples and opportunities to deepen their understanding of their own leadership style Transformational Leadership Edward J. Shelton,2012-09 With the publication of They Love You They Hate You Discovering Leadership in 2007 a new comprehensive review of basic leadership behaviors were presented to global corporations and frontline leaders that provided a guide to talent retention empowerment engagement and commitment building Now Dr Shelton introduces First They Came a popular poem attributed to Martin Niem ller describing how Hitler during his rise to power purged group after group without much opposition This is a continuance on the principles of courage trust and serving others around you in a transformational way Transformational leadership is a philosophy and a way of life it cannot be gained in a leadership short course but only through study experience and application Constructive leadership qualities are not secret and have been applied since the beginning of

mankind Trust kindness integrity empowerment communications other orientation knowledge seeking motivation and courage are discussed in detail with supporting cases and anecdotes Many of these characteristics are not taught in the academic schools of management yet they remain as powerful today as they had been in the past First They Came originated as anecdotes and life experiences regarding failed and successful acts of leadership Chapters in the book deal with leadership in military industry academia the Middle East and across cultures In the end Martin Niemöller's poem suggests that we must set our moral standards higher and seek for one another's best interest in life and in business The Dark Side of Transformational Leadership Dennis Tourish,2013-03-12 Most research into leadership has presented leaders as heroic charismatic and transformational visionaries The leader whether in business politics or any other field is the most important factor in determining whether organizations succeed or fail Indeed despite the fundamental mistakes which have arguably directly led to global economic recession it is often still taken for granted that transformational leadership is a good thing and that leaders should have much more power than followers to decide what needs to be done The Dark Side of Transformational Leadership confronts this orthodoxy by illustrating how such approaches can encourage narcissism megalomania and poor decision making on the part of leaders at great expense to those organizations they are there to serve Written in a lively and engaging style the book uses a number of case studies to illustrate the perils of transformational leadership from the Jonestown tragedy in 1978 when over 900 people were either murdered or committed suicide at the urging of their leader to an analysis of how banking executives tried to explain away their role in the 2008 financial crisis This provocative and hugely important book offers a rare critical perspective in the field of leadership studies Concluding with a new approach that offers an alternative to the dominant transformational model The Dark Side of Transformational Leadership will be an invaluable text for academics interested in leadership students on leadership courses requiring a more critical perspective and anyone concerned with how people lead people and the lessons we can learn Leadership in English Language Teaching and Learning Christine Anne Coombe,2008 Leadership skills are indispensable in language teaching and learning and the effectiveness of these skills directly affect the quality of language education the soundness of a program and the satisfaction level of both teachers and students in the language classrooms and beyond Part 1 of this collection provides the theoretical underpinnings of leadership development Part 2 focuses on leadership skills and strategies on the topics of interpersonal communication personal organization skills and program organization skills Part 3 discusses ELT leadership issues in U S public schools The contributors to this volume include leaders who have contributed to the TESOL profession in various capacities Their collective expertise makes this volume an excellent resource for teachers and program directors **Management** Arthur G.
