Readings in Groupware and Computer-Supported Cooperative Work Ronald M. Baecker,1993-01-13 This comprehensive introduction to the field represents the best of the published literature on groupware and computer supported cooperative work CSCW The papers were chosen for their breadth of coverage of the field their clarity of expression and presentation their excellence in terms of technical innovation or behavioral insight their historical significance and their utility as sources for further reading Taken as a whole the papers and their introductions are a complete sourcebook to the field This book will be useful for computer professionals involved in the development or purchase of groupware technology as well as for researchers and managers It should also serve as a valuable text for university courses on CSCW groupware and human computer interaction

Modem Handbook for the Communications Professional Cass R. Lewart,1987

Instructional Design: International Perspectives II Sanne Dijkstra,Franz Schott,Norbert Seel,Robert D. Tennyson,Norbert M. Seel,2014-03-18 Instructional design theory and practice has evolved over the past 30 years from an initial narrow focus on programmed instruction to a multidimensional field of study integrating psychology technology evaluation measurement and management The growth of instructional design ID has occurred because of direct needs problems and goals from society Its application in planning instruction first developed in the United States with the Department of Defense during World War II with the purpose of meeting immediate concerns for effective training of larger numbers of military personnel From the beginning ID has rapidly expanded into applications in industrial and executive training vocational training classroom learning and professional education Although ID has its roots in the U S applications and theoretical growth is an international activity However literature at the international level is still limited to either individual author contributions or collections primarily represented by single countries As a result there is no standard reference source that contains the rich variety of theories and applications to form the international foundation for the field The goal of this two volume set is to establish international foundations for ID theory research and practice within the framework of the two following objectives to identify and define the theoretical research and model foundations for ID and to bridge the gap between ID foundations and application Volume I includes chapters on philosophical and theoretical issues on learning theory and ID models Volume II provides an overview of the state of the art of solving ID problems The contributors offer contrasting points of view which provide a rare opportunity to see the diversity and complexity in the field The editorial committee has selected a wide range of internationally known authors to make presentations in the topic areas of the field

Computer Architecture Barry

Wilkinson,1991 Computer Systems Organization general **Software Process Technology** Wilhelm Schäfer,1995-03-22
This volume presents the proceedings of the Fourth European Workshop on Software Process Technology EWSPT 95 held in Noordwijkerhout The Netherlands in April 1995 The book contains 28 revised full research papers selected from a total of 50 submissions in addition the session chairpersons contributed 7 short surveys on the topics treated Among the issues addressed are analysis and metrics application experiments language experiments models for distributions mechanisms for cooperation and change and meta processes This book documents that software process technology has become a key technology to cope with the challenges of team oriented production of large and high quality software systems **PC Magazine** ,1994-02 **Mini-micro Systems** ,1983 Real-Time Systems Ian Pyle,1993-08-31 The result of a large research project conducted by a multinational team of practicing systems developers Using an industrial perspective they describe problems encountered in the creation of real time systems Demonstrates the deficiencies of the tools and techniques available along with problems to be overcome Includes actual case studies which provide insights to necessary solutions
