# The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it is designed to the people.

Before making any significant decisions or investments, it is important to understand the preferences, needs and expectations of the employees, their managers and other stakeholders who will be part of their life.

The way to build a hybrid work model is to first understand the needs, preferences and expectations of the people, and then design the model to meet those needs.

How do you design a hybrid work model? A successful hybrid work model is one that is designed to the people, and that is designed to meet their needs, preferences and expectations. It is a model that is designed to be effective, efficient and enjoyable for everyone involved.
