**Explaining Value and Other Essays in Moral Philosophy** Gilbert Harman, 2000 Explaining Value is a

selection of the best of Gilbert Harman's shorter writings in moral philosophy. The thirteen essays originally published between 1967 and 1999 are divided into four sections which focus in turn on moral relativism, values and valuing, character traits and virtue ethics, and ways of explaining aspects of morality. An indication of the breadth of interest of the book can be given by mentioning a few of the compelling questions which Harman discusses: What accounts for the existence of basic moral disagreements? Why do most people think it is worse to injure someone than to fail to save them from injury? Why do many people think it is morally permissible to treat animals in ways we would not treat people? What is it to value something and what is it to value something intrinsically? How much of morality can or should be explained in terms of human flourishing or the possession of virtuous character traits? How do people come to be moral? Harman's distinctive approach to moral philosophy has provoked much interest; this volume offers a fascinating conspectus of his most important work in the area.

The International, 1900     *Teacher Education Policy and Practice in Europe* Ana Raquel Simões, Mónica Lourenço, Nilza Costa, 2018-05-11 *Teacher Education Policy and Practice in Europe* provides a critical overview of the current challenges facing teacher education policy and practice in Europe. Drawing on a wide range of contributions, the book demonstrates that in order for teachers to reassume their role as agents of change, it is crucial to create a vision of a future European teacher and promote active engagement in preparing children to live and act in a multicultural and increasingly changing world. The book suggests ways in which teachers could be prepared to meet and overcome the struggles they will encounter in the classroom, including recommendations for teacher education which open up new possibilities for policy, practice, and research. Considering their own experiences as teachers, contributors also cover topics such as teacher education for the 21st century, the profile of the European teacher, citizenship and identity, social inclusion, linguistic and cultural diversity, and comparative education. *Teacher Education Policy and Practice in Europe* is essential reading for academics, researchers, and postgraduate students engaged in the study of teacher education, educational policy, and educational theory. It should also be of great interest to research-active teacher educators and practising teachers.
