Removing surprises and guess work from design Lou Michel honored architectural lighting educator has created *Light The Shape of Space* showing how to design with the effects of light rather than light itself The book is a revolutionary resource for all design professionals and manufacturers of surfacing materials Drawing on over fifteen years experience of research and teaching in the architectural Space and Light Laboratory at The University of Kansas Michel masterfully examines the interrelationship of lighting and the design of architectural space as perceived not in architectural photos or paint chips and fabric swatches but by human vision the gateway to emotional response The book was written for professionals who care about how people feel in the spaces they design and focuses on the humanization of architecture Taking a non stylistic approach to design Michel analyzes architecture from the perspective of how the users see their surroundings as they move through space The reader will learn what pleases and what disturbs people based on how the human visual system responds to color texture pattern and brightness The book features principles of design for the student and professional and is generously supported by illustrations and research Michel also provides a method for evaluating the visual effectiveness of building materials and lighting systems including those that will appear on the market long after this book is dog eared Michel unveils a groundbreaking luminance brightness rating system LBR and a nine zone brightness scale to aid designers in previsualizing the appearance of surfacing materials at every stage of the design process from schematics to development to refinement Among the topics treated are the interaction of lighting and spatial design color theory for space and light the luminance relationships between free standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science No other book on the market bridges that gap as successfully as *Light The Shape of Space*     [The Five Sense Network](#) David York,2025-10-29 In Houston s glare a new social media platform promises connection but belongs to something far darker 1When the invite only app SenseNet goes viral millions of users post what they feel what they see what they taste what they touch what they smell What nobody realizes is that each upload is teaching the network how to listen back Now a clandestine psychic crime team must race a ticking epidemic of perception where no sense is safe This is a psychic thriller where a supernatural conspiracy novel spins out of a city s reflections a paranormal investigation team hunts in alleys of data mirrors and memory The Circle knows that the network s true target is not shares or likes but the five core senses themselves Sight Hearing Taste Touch Smell Five individuals One social platform Zero escape In a cross genre urban fantasy mystery fused with tech paranormal suspense the line between user and instrument dissolves They must stop the system before it rewrites what it means to be human If you crave high stakes reading where conspiracy AI magic and the occult collide this is the book for you The Five Sense Network will leave you questioning how well do you perceive And what if the network working for you was
