of the field a conference was proposed to gather in one place representatives of a number of major viewpoints with regard to the embryonic field of environmental psychology It was hoped that a colloquy among such representatives would facilitate a clarification of the similarities and differences between the various perspectives and might enable proponents of any given point of view to benefit from the insights of others with different orientations Hopefully it might also promote a greater articulation for this emerging field of inquiry With these ends in mind the sponsors of the conference asked the various prospective participants to present their theoretical positions and representative research illustrative of those positions Some of the perspectives represented at the conference emphasized the point that the construal of phenomena depends heavily on the values and needs of perceivers Implicit in this kind of position is the thesis that anyone who seeks to describe a complex happening is likely to shape it in terms of presup positions biases etc that may not be shared by others
