## Way With Animals:

*A Way with Animals* Bruce Buchenholz, 1978      [Animals at work](#) Lindsay Hamilton, Nik Taylor, 2013-05-15 *Animals at Work* is founded upon a broad and unique variety of empirical research settings animal sanctuaries farms slaughter houses veterinary practices and behind the scenes of a natural history documentary film making team Hamilton and Taylor apply a breadth of post structural and post humanist theories to establish what happens when animal agents are brought into human networks and spaces of representation and the artful ways in which they become integral in shared human meaning making Interrogating the apparent boundaries of meaning between animals and humans by taking a close up view of those working with animals in a variety of occupational settings the book enjoys a rare and original range of empirical research contexts from British dairy farms to the jungles of Borneo      [The Gentle Way with Pets](#) Tom T. [Making a Stand for Animals](#) Oscar Horta, 2022-06-23 Engaging and thought provoking this book examines how humans see and treat other animals and argues that we should extend equal consideration and respect to all beings human and nonhuman alike Our world is plighted by isms such as racism and sexism but we may have overlooked a very important one speciesism Speciesism is a form of discrimination against those who don t belong to a certain species It drives us to see nonhuman animals as objects rather than individuals with their own interests and with the ability to feel and suffer This book questions all of the assumptions speciesism is based upon It raises many challenging questions over humans very complicated attitudes toward other animals Thinking about how animals are used as well as the suffering of wild animals and what the future may be for all beings this book calls for society to seriously take into account the interests of all animals For all who care about animals or simply how to make the world a better place this book is essential reading      [The Evolution of Human Consciousness and Linguistic Behavior](#) , Karen A. Haworth, Terry J. Prewitt, 2020-09-22 Drawing from the disciplines of cognitive science Paleolithic anthropology art history and semiotics Karen A Haworth and Terry J Prewitt offer a novel discussion of the origins of language based primarily in the distinction of holistic versus analytical cognitive processing Also

by employing a refined view of human symboling capacities grounded in the writings of C S Peirce they provide a short but comprehensive explanation of what the artifacts and art of the Paleolithic and Mesolithic periods suggest about language origins Their interpretation supports a semiotic argument that iconic and indexical logical modeling precedes human elaboration of experience by symbolic reference in words or propositions and ultimately in what Peirce called the argument Further they suggest that the use of symbols to model the world developed rapidly between about 20 000 and 10 000 years ago and has the effect of giving emphasis to analytic thought as the dominant mode of human consciousness Rather than seeing symbols as the impetus for human logic they argue for presymbolic elements of logic in Peirce s sign categories shared widely by humans and other animals Intended readers are scholars in philosophy anthropology psychology linguistics and semiotics as well as interested nonspecialists The presentation is also complemented with brief personal narratives intended to offer background that helps make a dense academic argument more accessible to the widest audience possible The authors insights into the basis for language have ramifications for any number of other fields education psychology philosophy prehistory and art to name a few
