Young French Architects:

Jeunes Architectes Français Corinne Jaquand-Goddefroy, Claus Kämpflinger, 1999 In recent years a remarkable generation of young architects has developed in France whose work is often characterized by a fearless use of material often steel and concrete or by the play of transparency and the dissolving of materiality Projects such as Nasrine Seraji's American Center in Paris the Academy of Fine Arts in Limoges by LabFac or the Cemetery in Roquebrune by Marc Barani have all attracted international acclaim This book presents 14 of the most interesting offices from all regions of France and attempts to provide an overall view of this phenomenon Amongst the offices documented are Avant Travaux Laurent Emanuelle Beaudoin Besset Lyon Frederic Borel Brochet Lajus Pueyo Manuelle Gautrand Herault Arnod Lipsky Rollet Francois Roche Tectoniques and Tetrarc

A History of French Architecture from the Death of Mazarin Till the Death of Louis XV, 1661-1774 Sir Reginald Theodore Blomfield, 1921 French Encounters with the American Counterculture 1960-1980 Caroline Maniaque-Benton, 2016-12-05 French American interrelationships in the areas of design and creative thinking have been under acknowledged It is normally asserted that French architects looked to North America for technical lessons in the development of modern architecture in the 1960s but that the French cultural environment was generally hostile to American ideas This book includes interviews with French architects who visited the United States in the 1960s 1970s and then assumed influential positions in the press and education in France Some of these architects found in non mainstream America and its radical groups of architectural drop outs a liberating force free of the taint of American capitalism and the high investment technology Often living in alternative student communities they saw highly innovative low cost technical and structural systems placed in the service of collective forms of living which represented a critique not only of professional architectural practice but also of bourgeois forms of living Many of them also studied in American schools of architecture and came in contact with an intellectual and interdisciplinary style of architectural education unavailable in France at that time
