**Naval Aviation in the Second World War** Philip Kaplan, 2013-10-30 The first aircraft carriers made their appearance in the early years of World War I These first flattops were improvised affairs built on hulls that had been laid down with other purposes in mind and it was not until the 1920s that the first purpose built carriers were launched but no one was as yet clear about the role of the carriers and they were largely unloved by the battleship admirals who still believed that their great dreadnoughts were the ultimate capital ships World War II changed all that At Taranto Pearl Harbour and in the North Atlantic the carrier the ugly duckling of the world's navies proved itself to be the dreadnought nemesis As the tide of war turned the fast attack carriers of the U S Navy spearheaded the counter attack in the Pacific while the makeshift escort carriers helped to seal the fate of the German U boats in the Atlantic The carrier and naval aviation thus emerged into the post war world as the primary symbol and instrument of seapower it would play a crucial role in the strategic encirclement of the Soviet Union and enabled western airpower to be rapidly and effectively deployed in areas of conflict as remote as Korea Vietnam the Falklands and the Gulf Kaplan describes the adventure of the young American British and Japanese naval aviators in the Second World War It is an account of their experiences based on archives diaries published and unpublished memoirs and personal interviews with veteran naval airmen of WWII providing a vivid and often hair raising picture of the dangers they encountered in combat and of everyday life aboard an aircraft carrier It considers some of the key aspects of the WWII naval aviator's combat career such as why it was that only a tiny minority of these pilots those in whom the desire for aerial combat overrode everything accounted for such a large proportion of the victories In the major carrier actions of that conflict from the Royal Navy's attack on Taranto which crippled the Italian fleet in 1940 to the Japanese carrier launched surprise attack on U S Navy battleships and facilities at Pearl Harbour in 1941 to the carrier battle of Midway in 1942 and the Great Marianas Turkey Shoot of 1944 through the Japanese Kamikaze campaign against the U S Carriers in the final stages of the Pacific war this book takes the reader back to one of the most exciting and significant times in modern history

*Fighter Zero* Mantelli - Brown - Kittel - Graf, 2017-03-05 From the attack on Pearl Harbor to the last desperate defense in the face of massive Allied bombings and suicide attacks against the enemy squadrons the Mitsubishi A6M Reisen baptized Rei sen ie hunting zero with reference to the year 2600 calendar Japanese 1940 AD took part in almost all major actions of naval Japanese Its fabulous maneuverability and its exceptional autonomy were legendary and made the Zero symbol of air power of the Rising Sun as to make it as famous as the Spitfire or Bf 109 Zero earned fame with a series of brilliant victories against all allied aircraft in the first months of the war in the Pacific and since he found difficulty Japanese Navy to commission another modern fighter capable of competing with the new Allied aircraft that appeared in the Pacific towards the end of 1942 the Mitsubishi A6M had to endure in large part the weight of the operations until the end of the conflict For Japan the Zero was in fact much more than an airplane but the symbol of the Empire air power for the Allies was

much more of a relentless opponent but a nightmare and at the same time a myth For a long time were the virtues attributed largely imaginary since its unique and indisputable qualities were exceptional maneuverability and an equally exceptional autonomy The Mitsubishi A6M Zero was one of those planes that could not raise more mixed reviews now ignored feared now finally ridiculed and then again taken into consideration mythologized analyzed critically overrated underrated and so on seamless When hostilities began with the outbreak of World War II the Zero was considered the best fighter in the world based on aircraft carriers because they associated an excellent maneuverability granted very extensive In the first air combat the Zero gained a legendary reputation but in 1942 the new combat tactics enabled the Allied pilots to engage in duels more balanced terms

VIOLET LIGHTNING John Eric Vining,2020-11-13 An epic achievement over one hundred years in the making In December 1941 Japan had perhaps the greatest combination of land sea and air forces the world had ever seen and she used these to conquer a huge empire in the Western Pacific and East Asia Yet by August 1945 Japan had been beaten to her knees by the combined power of China Great Britain and the United States Was this destruction inevitable Did Japan have no chance to defeat America and her allies Why would she think she could successfully battle the two greatest industrial powers the world had ever known Great Britain and the United States at the same time Violet Lightning A Blueprint for Japanese Victory in the Pacific 1941 1942 is a sweeping narrative over a century in the making From the first confrontation in 1895 between the United States and Japan over Hawaii to the massive Japanese defeats at Midway and Guadalcanal in 1942 to author John Eric Vining s first interest in the Japanese American conflict in the fall of 1967 by reading Carrier War in the Pacific to the fall of 1995 when Vining first put pen to paper on this project and finally to 2020 s finished product by Page Publishing Vining reviews a history of the acrimony between Japan and the United States in the first half of the Twentieth Century He then builds what one reviewer calls a chillingly believable scenario for a Japanese victory in the greatest of all wars Violet Lightning poses and answers the question Could Japan really have pulled it off You just might find yourself coming around to a point of view you didn t believe was possible
