Neumann,2024-02-02 People typically misunderstand how power works in schools Common thinking says that things like high stakes testing school reform efforts and political mandates exert the most power on schools The reality however is that power comes from everywhere It isn t a thing that only certain people possess nor does it operate linearly as in simple actions and reactions Instead power acts more like a web if you exert power in one part of a school the effects often spread across the rest of it The usual emphasis on big easy to see influences causes schools

to focus on the wrong concerns the big public ones instead of the ones which make the most impact the small daily ones This book examines everyday phenomena inside schools to reveal the complexity and nuance of power and makes practical suggestions for how schools can manage power more effectively to maximize students learning

**Summary of the 48 Laws of Power** Summary Books,2017-05-21 This is a summary of bestselling author Robert Greene s The 48 Laws of Power by Robert Greene This summary is intended to give you an in depth overview of the key concepts and ideas of the book At Summary Books we read every chapter extract the meaning and leave you with a new perspective and time to spare We do the work so you can understand the book in minutes not hours This concise book summary will help you cut through the 452 page full version of The 48 Laws of Power and quickly understand the key concepts and ideas For a lot of people feeling powerless is an unbearable feeling that makes them feel helpless and miserable Even the most passive people never want less power over their lives and environments People are always looking for more power However this is where things get hairy If we seem too power hungry it can be dangerous and we can be considered a threat to others For that reason we have to be subtle when seeking more power in our lives Think about it in terms of aristocratic courts from

centuries ago that you see portrayed on television and in movies In those times a court was established around whoever was in power at that time king emperor etc and the courtiers were there to serve this person but each courtier had to do this in a way that wouldn't alert other courtiers and make them think that they were vying for more power through a higher position If suspicions arose because of this a courtier might take action against that courtier To prevent that from happening things were done in subtle and covert fashions in order to not draw attention All of this had to happen in a place that was supposed to be the most elegant and refined too So not only did everyone have to keep up their refined attitudes but they also had to be cunning To do this most turned to seduction charm and properly thought out strategies instead of the usual treachery that most power struggles consist of Nowadays things are a lot like those aristocratic courts You have to be devious to gain the power you're looking for and you have to do so while still appearing to be a fair and civilized person To some power games like this seem evil and wrong but the truth of the matter is that most people enter into these types of games on some level Even those who denounce power games and claim to have the moral high ground are more than likely playing a game of their own while trying to appear innocent At times these people may even be the biggest players and most manipulative individuals That is because their constant shunning of power games can make those around them believe that they'd never do anything underhanded leaving them free to play their game undetected When the world seems to be full of scheming courtiers looking to get ahead there is really no way you can get through life without playing some kind of power game Since this game is inescapable you can only benefit by learning how to play it properly To do this you have to look at the world a certain way and learn the laws of power and acquire some basic skills that will allow you to apply those laws easily throughout your life
