Energy Technologies provides guidance on economic evaluation approaches metrics and levels of detail required while offering a consistent basis on which analysts can perform analyses using standard assumptions and bases. It not only provides information on the primary economic measures used in economic analyses and the fundamentals of finance but also provides guidance focused on the special considerations required in the economic evaluation of energy efficiency and renewable energy systems.

Photovoltaics Solar Energy International, 2004. Producing electricity from the sun using photovoltaic PV systems has become a major industry worldwide. But designing, installing, and maintaining such systems requires knowledge and training, and there have been few easily accessible comprehensive guides to the subject. Now with *Photovoltaics Design and Installation Manual*, a world-class solar energy training and education provider, Solar Energy International (SEI) has made available the critical information to successfully design, install, and maintain PV systems. The book contains an overview of photovoltaic electricity and a detailed description of PV system components including PV modules, batteries, controllers, and inverters. It also includes chapters on sizing photovoltaic systems, analyzing sites, and installing PV systems, as well as detailed appendices on PV system maintenance, troubleshooting, and solar insolation data for over 300 sites around the world. Used worldwide as the textbook in SEI's PV Design Installation workshops, topics covered include: The basics of solar electricity, PV applications, and system components; Solar site analysis and mounting; Stand-alone and PV generator hybrid system sizing; Utility interactive PV systems; Component specification; system costs and economics; Case studies and safety issues.

Photovoltaics guarantees that those wanting to learn the skills of tapping the sun's energy can do so with confidence. Solar Energy International (SEI) has the nonprofit mission to respond to the need for renewable energy education. Based in Carbondale, Colorado, and active around the world, SEI is a link between people and renewable energy resources, providing information, education, and training to people who want to shape a sustainable future. SEI is recognized by the National Board of Certified Energy Practitioners (NABCEP) as a dedicated independent provider of PV training programs that may be used toward attaining PV certification. Also, SEI is recognized as an Accredited Institution to offer PV training by the Institute for Sustainable Power (ISP).

A Manual for Renewable Energy Assessment Marcia M. Gowen, 1984. This manual covers a rudimentary set of equations needed for estimating the energy potential and economics of various fuels and energy conversion. The primary purpose of the manual is to provide energy analysts with a common set of equations for comparing fuels and conversion technologies to make a general but not necessarily definitive energy and economic assessments. It focuses on conditions prevalent in tropical countries and describes how an energy planner might calculate a feedstock's energy potential after adjusting for various factors. A second objective of the manual is to provide planners with empirical data on fuels and technologies used in tropical regions, in particular the Asia-Pacific regions. A third objective is to present analysts with some simple economic tools to make financial analyses of energy systems, as well as discuss various social benefits or costs of alternative energy systems. Finally, the overriding objective of this manual is to tie together types of analyses, energy
