The Maybe Universe J. Hacsí,2002-08-07 Modern science has placed before us a vast and ancient universe one said to contain a billion trillion stars clustered in a hundred billion galaxies and to be thirteen billion years old Our earthly home we are told is a tiny chunk of matter randomly formed revolving around a mediocre star in the outlying reaches of an unspectacular galaxy Life on earth developed by chance We are the end result of a series of accidents This scientific Story of Creation though finely detailed isn t based on cold hard fact Scientists proclaim without a shred of proof that the laws of nature remain constant through both time and space Upon this rock they build their world This scientific premise cannot be proved It must be taken on faith This book dismisses the scientific premise and explains the universe based on an equally unprovable premise That we are created in the image of our creator and create the material world in our image It then sets out to prove that the universe is not a vast ancient place ruled by chance but rather exists as a reflection or shadow or mirror image of us
