*Random Violence* Joel Best,1999-03-02 *Random Violence* is a deft and thought provoking exploration of the ways we talk about and why we worry about new crimes and new forms of victimization

Focusing on so called random crimes such as freeway shootings gang violence hate crimes stalking and wilding Joel Best shows how new crime problems emerge and how some quickly fade from public attention while others spread and become enduring subjects of concern Best s original and incisive argument illuminates the fact that while these crimes are in actuality neither new nor epidemic nor random the language used to describe them nonetheless shapes both private fears and public policies Best scrutinizes the melodramatic quality of the American public s attitudes toward crime exposing the cultural context for the popularity of random violence as a catch all phrase to describe contemporary crime and the fallacious belief that violence is steadily rising He points out that the age race and sex of homicide victims reveal that violence is highly patterned Best also details the contemporary ideology of victimization as well as the social arrangements that create and support a victim industry that can label large numbers of victims He demonstrates why it has become commonplace to declare war on social problems including drugs crime poverty and cancer and outlines the complementary influence of media activists officials and experts in institutionalizing crime problems Intrinsic to all these concerns is the way in which policy choices and outcomes are affected by the language used to describe social problems

The Criminalisation of Stalking Emily Finch,2024-11-01 First published in 2001 The Criminalisation of Stalking fills a much needed gap by drawing upon a range of methodologies to present a thorough and comprehensive examination of the way in which stalking became perceived as a pressing and prevalent social problem in need of legal intervention as well as providing a critical evaluation of the efficacy and sufficiency of the legal responses Essentially this book has two main objectives first to provide a comprehensive account of the process by which stalking came to be regarded as a significant social problem which merited legal intervention and to evaluate that response And secondly to situate this within a wider theoretical context which addresses the role of the criminal law in dealing with social problems and the boundaries of criminalization This illustrates how a detailed consideration of a particular issue can inform wider debate and provide a unique perspective on existing theoretical material This socio legal perspective facilitates the use of a range of methodologies to challenge the existing conceptualization of stalking and to present a wider range of potential solutions to this complex social problem This is a must read for scholars and researchers of criminology

Images of Issues Joel Best,2017-09-29 Constructionist theory describes and analyzes social problems as emerging through the efforts of claimsmakers who bring issues to public attention By typifying a problem and characterizing it as a particular sort claimsmakers can shape policymaking and public response to the problem Th is new edition of Images of Issues addresses claimsmaking in the 1990s featuring such issues as fathers rights stalking sexual abuse by the clergy hate crimes multicultural education factory farming and concluding with an expanded discussion of the theoretical debate over constructionism
