Starkeys Gold:

Mechanic's Magazine ,1853 **Laboratories of Art** Sven Dupré,2014-04-25 This book explores the interconnections and differentiations between artisanal workshops and alchemical laboratories and between the arts and alchemy from Antiquity to the eighteenth century In particular it scrutinizes epistemic exchanges between producers of the arts and alchemists In the fifteenth and sixteenth centuries the term laboratorum uniquely referred to workplaces in which chemical operations were performed smelting combustion distillation dissolution and precipitation Artisanal workshops equipped with furnaces and fire in which chemical operations were performed were also known as laboratories Transmutational alchemy the transmutation of all base metals into more noble ones especially gold was only one aspect of alchemy in the early modern period The practice of alchemy was also about the chemical production of things medicines porcelain dyes and other products as well as precious metals and about the knowledge of how to produce them This book uses examples such as the Uffizi to discuss how Renaissance courts established spaces where artisanal workshops and laboratories were brought together thus facilitating the circulation of materials people and knowledge between the worlds of craft today s decorative arts and alchemy Artisans became involved in alchemical pursuits beyond a shared material culture and some crafts relied on chemical expertise offered by scholars trained as alchemists Above all texts and books products and symbols of scholarly culture played an increasingly important role in artisanal workshops In these workplaces a sort of hybrid figure was at work With one foot in artisanal and the other in scholarly culture this hybrid practitioner is impossible to categorize in the mutually exclusive categories of scholar and craftsman By the seventeenth century the expertise of some glassmakers silver and goldsmiths and producers of porcelain was just as based in the worlds of alchemical and bookish learning as it was grounded in hands on work in the laboratory This book suggests that this shift in workshop culture facilitated the epistemic exchanges between alchemists and producers of the decorative arts **Iron** Perry Fairfax Nursey,1853 **Mechanics Magazine** ,1853 **The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces** ,1873 **The Mechanics' Magazine** ,1853 **Mechanics' Magazine and Journal of Enigneering, Agricultural Machinery, Manufactures, and Shipbuilding** ,1853 *Mechanics Magazine* John I Knight,1853 The Journal of the Armed Forces ,1872 **Herd Register of the American Jersey Cattle Club** ,1917 **England in the Reign of King Henry the Eighth.
