[Moving into Adolescence](#) Roberta G. Simmons, 2017-07-05 From the sociological point of view adolescence traditionally has been described as a period of physical maturity and social immaturity Adolescents reach physical adulthood before they are capable of functioning well in adult social roles The disjunction between physical capabilities and socially allowed independence and power and the concurrent status ambiguities are viewed as stressful for the adolescent in modern Western society It has been assumed that the need to disengage from parents during these years will result in high levels of rebellion and parent child conflict Moving into Adolescence follows students as they make a major life course transition from childhood into early adolescence Substantial controversy has been generated within the behavioral sciences concerning the difficulty of adolescence as a transitional period On the one hand there are those who characterize the period as an exceptionally and necessarily stressful time in the life course On the other hand many investigators treat this view of adolescence as their straw man To them the supposed tumult of adolescence is just that supposed and mythical The purpose of this book is to study the transition from childhood into early and middle adolescence in order to investigate change along a wide variety of psychosocial dimensions with a particular focus on the self image The authors investigate the impact of timing of pubertal change and also the movement from an intimate elementary school context into a large scale secondary school environment The first major movement into a large scale organizational context may cause difficulty for the child as may the dramatic changes of puberty In addition gender differences and changes in gender differences are studied Both short and long term consequences of transition are examined focusing on is the role of pubertal change and school transition

Self-directed Learning Oriented Assessments in the Asia-Pacific Magdalena Mo Ching Mok, 2012-10-09 The Asia Pacific region needs to maximize the benefits of education to enable it to compete in an economic future dominated by innovation in which assessing student progress must be an empowering rather than delimiting factor This detailed exposition of the theoretical basis and application tools of self directed learning oriented assessment SLOA reflects the very latest research championed by the Assessment Research Centre at The Hong Kong Institute of Education Featuring a range of relevant case studies it explores the varied theoretical issues related to SLOA and offers an integrated view of the system fully in line with the constructivist paradigm of learning which advocates formative rather than summative assessment Many of the initiatives outlined here are firsts in the region SLOA is already being applied in many schools with links to the ARC It is an approach to assessment that

acknowledges the centrality of self directed learning and which positions assessment as a tool to enable and enhance self directed learning It draws on several theories of learning and assessment including the constructivist notion that learning is best achieved when students take ownership of their educational process setting their own goals and monitoring their own progress towards those goals SLOA has been the research and service approach of the ARC since 2005 In the intervening years the centre has developed a number of tools to facilitate SLOA learning and assessment including vertical ability scales teacher friendly computer software and packages for self directed learning

Mediated Learning and Cognitive Modifiability David Tzuriel,2021-09-07 This book portrays an extensive and intensive discussion of theories and research that refer to Vygotsky s and Feuerstein s theories of mediated learning and their effects on learning potential and cognitive modifiability Most topics are discussed in relation to a broad spectrum of developmental and cognitive research that are under the conceptual umbrella of mediated learning and cognitive modifiability Some topics such as neural plasticity executive functions mental rotation and cognitive education are related to mediated learning though indirectly and therefore are included in this book In many ways the book presents an extension of Vygotsky and Feuerstein s theories and empirical validation in a variety of family social and cultural contexts The book includes a thorough analysis and summary of 50 years of research and methodology of the intimate relation between mediated learning interactions and cognitive modifiability and of dynamic assessment underlying measurement of cognitive modifiability Special emphasis is given to Tzuriel s dynamic assessment instruments developed during more than four decades Tzuriel s novel instruments are interwoven in the extensive research on parent child interactions siblings teachers and peers mediation and in validation of dynamic assessment approach and cognitive education programs aimed at development of thinking skills and academic achievements
