## Vittorio Gregotti:

**Vittorio Gregotti, Buildings and Projects** Manfredo Tafuri, 1982      Focus: Vittorio Gregotti, 1977      *Vittorio Gregotti. Architect of the Modern Project* Lorenzo Ciccarelli, 2025-03-31 This is not only a book about Vittorio Gregotti's projects and works but rather a historical critical analysis of his peculiar figure. Like a few others, Gregotti embodied the model of the architect-intellectual that characterised post-war Italian design culture. Editor of leading magazines, author of influential books and essays, professor at prestigious universities, curator of memorable exhibitions and events such as the 1976 Venice Biennale and founder of a firm that developed a wide range of projects for over 40 years, Gregotti tenaciously occupied all the territories available to the architectural profession, promoting cultural and design trends and triggering long-lasting controversies. This book examines the formation of Gregotti's theoretical positions around the notions of territory and modification, the connection with the profession, the relationship with history and the tradition of modern architecture, the notion of critical internationalism and the idea of the city and urban design in an era of increasing disurbanism. All aspects of a cultural project aimed at shaping and elaborating a certain tradition of modern architecture in the different social and economic conditions of his time, namely the emerging society of entertainment and consumption and then of information technologies and global financial markets. This work will be of interest to postgraduate researchers and academics in architectural theory and history as well as urban design and planning theory and history.      Thema Anthologie Joseph Rykwert, 1996 Vittorio Gregotti is one of the best-known architects of his generation in Italy. Beginning in the 1950s, Gregotti produced many large-scale housing projects, supermarkets and department stores for the Italian chain La Rinascente, college campuses including Florence, Calabria and Palermo, as well as graphic design for Ferrari, museum interiors, furniture and an extensive body of writing. This volume presents over 110 of Gregotti's projects from his early years with Architetti Associati through the founding in 1974 of Gregotti Associati, the 1986 founding of the Campo design company and his current work. Photographs, plans, sketches and models are accompanied by Gregotti's own writings which elucidate his commitment to historicism, his concern with the environment and his vast polemics. BOOK JACKET Title Summary field provided by Blackwell North America Inc. All Rights Reserved.      Architecture Theory since 1968 K. Michael Hays, 2000-02-28 An anthology of the pivotal theoretical texts that have defined architecture culture in the late twentieth century. In the discussion of architecture, there is a prevailing sentiment that since 1968, cultural production in its traditional sense can no longer be understood to rise spontaneously as a matter of social course but must now be constructed through ever more self-conscious theoretical procedures. The development of interpretive modes of various stripes: post-structuralist, Marxian, phenomenological, psychoanalytic as well as others, dissenting or eccentric, has given scholars a range of tools for rethinking architecture in relation to other fields and for reasserting architecture's general importance in intellectual discourse. This anthology presents forty-seven of the primary texts of architecture theory, introducing each with an explication of the concepts and categories.

necessary for its understanding and evaluation It also presents twelve documents of projects or events that had major theoretical repercussions for the period Several of the essays appear here in English for the first time Contributors Diana Agrest Stanford Anderson Archizoom George Baird Jennifer Bloomer Massimo Cacciari Jean Louis Cohen Beatriz Colomina Alan Colquhoun Maurice Culot Jacques Derrida Ignasi de Sol Morales Peter Eisenman Robin Evans Michel Foucault Kenneth Frampton Mario Gandelsonas Frank Gehry Jürgen Habermas John Hejduk Denis Hollier Bernard Huet Catherine Ingraham Fredric Jameson Charles A Jencks Jeffrey Kipnis Fred Koetter Rem Koolhaas Leon Krier Sanford Kwinter Henri Lefebvre Daniel Libeskind Mary McLeod Alberto Pérez Gómez Jos Quetglas Aldo Rossi Colin Rowe Massimo Scolari Denise Scott Brown Robert Segrest Jorge Silvetti Robert Somol Martin Steinmann Robert A M Stern James Stirling Manfredo Tafuri Georges Teysot Bernard Tschumi Anthony Vidler Paul Virilio Mark Wigley

### **The University as a Settlement Principle**

Francesco Zuddas,2019-09-17 The 1960s and the 1970s marked a generational shift in architectural discourse at a time when the revolts inside universities condemned the academic institution as a major force behind the perpetuation of a controlling society Focusing on the crisis and reform of higher education in Italy The University as a Settlement Principle investigates how university design became a lens for architects to interpret a complex historical moment that was marked by the construction of an unprecedented number of new campuses worldwide Implicitly drawing parallels with the contemporary condition of the university under a regime of knowledge commodification it reviews the vision proposed by architects such as Vittorio Gregotti Giuseppe Samon Archizoom Giancarlo De Carlo and Guido Canella among others to challenge the university as a bureaucratic and self contained entity and defend instead the role of higher education as an agent for restructuring vast territories Through their projects the book discusses a most fertile and heroic moment of Italian architectural discourse and argues for a reconsideration of architecture's obligation to question the status quo This work will be of interest to postgraduate researchers and academics in architectural theory and history campus design planning theory and history

The Architecture of Modern Italy Terry Kirk,2005-06-02 Modern Italy may sound like an oxymoron For Western civilization Italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting The ancient forum medieval cloisters baroque piazzas and papal palaces constitute our ideal itinerary of Italian civilization The Campo of Siena Saint Peter's all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations As seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of Italy The learning of history is always a complex task one that in the Italian environment is complicated by the changes wrought

everywhere over the past 250 years Culture on the peninsula continues to evolve with characteristic vibrancy Italy is not a museum To think of it as such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the Italian cultural condition and the writing of history itself *Vittorio Gregotti and Associates* Joseph Rykwert,2005-01-01 Vittorio Gregotti one of the best known architects of his generation in Italy produced many large scale housing projects supermarkets and department stores for the Italian chain La Rinascente This book covers most of his projects also from his early years with Architetti Associati This book is an essential resource on this celebrated architect whose impact on European design and planning and indeed whose worldwide renown as a social thinker and rationalist is truly monumental *Urban Design Ecologies* Brian McGrath,2013-01-14 The discipline of urban design is undergoing a rapid expansion and realignment It is experiencing a shift from a profession dominated by architects and planners directed at urban development to a more expansive set of practices engaging new forms of social and environmental ecologies as cities worldwide adapt to economic restructuring mass migrations and climate change Bringing together classic and new texts from the last 40 years this AD Reader focuses attention on the critical tools needed to understand how cities have been designed and constructed and then changed over time This enables new ways of envisioning how cities must be conceived and adapted in the future to the dual conditions of rapid urbanisation and economic restructuring coupled with unpredictable environmental conditions due to climate change With its emphasis on both urban design and the ecological this book brings together key articles that point the way forward for reconciling the often conflicting concerns of urbanism and environmentalism Twenty three texts are organised into four distinct sections covering metropolitan architecture the sprawling megalopolis the megacity and the recently emerging metacity These are broadly chronological and highlight the recent thinking behind some of the key urban developments ranging from the art of traditional city making covered by European architects and historians in the late 20th century to contemporary Tokyo described by Atelier Bow Wow Features original texts from Reyner Banham Rem Koolhaas Aldo Rossi Colin Rowe David Grahame Shane Bernard Tschumi Oswald Mathias Ungers and Robert Venturi Denise Scott Brown and Steven Izenour Contains newly commissioned texts from Mary Cadenasso Sharon Haar and Victoria Marshall Carlos Leite Steward TA Pickett and Albert Pope Includes new translations of important essays by Vittorio Gregotti and Paola Vigan Topics range from the European historic city to the Las Vegas Strip and the megacity of S o Paulo taking in the global sustainable city *Encyclopedia of Twentieth Century Architecture* R.
