## **Vogt For The Environment:**

**Vogt for the Environment** John Sailer,1993-01-01 Relates how teenaged environmentalist Tanja Vogt convinced McDonald s as well as businesses and schools in her area to stop using styrofoam [Nuclear Science Abstracts](#) ,1966  
*Workshop Proceedings* ,1993 *Publications of the Water and Environment Research Institute* ,1994 **American Environmental Leaders: L-Z** Anne Becher,2000 This book presents more than 350 biographies of men and women who have devoted their lives to studying debating and organizing controversial environmental issues over the last 200 years In addition to the scientists who have analyzed how human actions affect nature we are introduced to poets landscape architects presidents painters activists even sanitation engineers and others who have forever altered how we think about the environment The easy to use A Z format provides instant access to these individuals and frequent cross references indicate others with whom individuals worked and sometimes clashed End of entry references provide users with a starting point for further research *Plant Roots and Their Environment* International Society of Root Research,1991 Scientists within a wide field ranging from applied forestry and agriculture to physiology ecology and the environmental sciences are today more than ever involved in root and mycorrhizal research New problem oriented research fields have arisen such as the effects of fertilizers and pesticides forest management and regeneration etc At a time when root research is expanding into different areas it is much more difficult for the root scientist to penetrate all the new information appearing in literature The contributors of this volume are leading scientists from different fields of root research The ISRR symposium in Uppsala clearly demonstrated that there are new techniques in progress in particular with regards to video recording of plant root systems and digital image processing **Climate Change and Genocide** Jürgen Zimmerer,2017-10-02 Climate change caused by human activity is the most fundamental challenge facing mankind in the 21st century since it will drastically alter the living conditions of millions of people mainly in the Global South Environmental violence including resource crises such as peak fossil fuel will lie at the heart of future conflicts However Genocide Studies have so far neglected this subject due to the emphasis that traditional genocide scholarship places on ideology and legal prosecution leading to a narrow understanding of the driving forces of genocide This books aims at changing this initiating a dialogue between scholars working in the areas of climate change and genocide Research into genocide as well as climate change is a highly interdisciplinary endeavour transcending the boundaries of established disciplines Contributions to this book address this by approaching the subject from a wide array of methodological theoretical disciplinary and regional perspectives As all the contributions show climate change is a major threat multiplier for violence or non violent destruction and any understanding of prevention needs to take this into account They offer a basis for much needed Critical Prevention Studies which aims at sustainable prevention This book was originally published as a special issue of the International Journal of Human Rights  
**Christian Ethics of Creation** Michael Rosenberger,2022-11-04 Wenn die gewaltigen kologischen Herausforderungen

der Gegenwart bewältigt werden sollen braucht es klare ethische Orientierungen und tiefe Quellen innerer Kraft Der Autor reflektiert die Potenziale der christlichen Tradition für eine Ethik und Spiritualität der Schöpfung Dafür greift er auf biblische und liturgische Impulse ebenso zurück wie auf die Enzyklika *Laudato si* von Papst Franziskus und setzt sie mit naturwissenschaftlichen soziologischen und ökonomischen Überlegungen in Beziehung Auf dieser Grundlage entwickelt es eine Handlungs- und Hoffnungsperspektive die durch Schwierigkeiten und Enttäuschungen hindurch tragfähig ist *The Oxford Handbook of Comparative Environmental Law* Emma Lees, Jorge E. Viñuales, 2019-05-06 This Handbook is the first comprehensive account of comparative environmental law It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points country studies from all continents responses to common problems including air pollution water management nature conservation genetically modified organisms climate change and energy chemicals waste foundational components of environmental law systems including principles property rights administrative and judicial organisation command and control regulation market mechanisms informational techniques and liability mechanisms and common interactions of environmental protection with the broader public private and criminal law contexts The volume brings together the foremost authorities in this field from around the world to provide a concise self contained and technically rigorous account of environmental law as a single overall system
