Transactions and Proceedings of the Royal Society of New Zealand, 1921 *Investigating Natural Disasters Through Children's Literature* Anthony D. Fredericks, 2001-04-15 Natural disasters enthrall with their potency, might, and devastation. Tap into students' inherent awe of storms, volcanic eruptions, hurricanes, earthquakes, tornadoes, floods, avalanches, landslides, and tsunamis to open their minds to the wonders and power of the natural world. Using quality children's literature as a springboard to learning, this guide extends the understanding of science concepts through short activities, longer projects, and adventures. This participatory approach keeps the focus on the processes of science and promotes a personal response to learning. Students can use the literature and activities not just to better understand the forces of nature but to grasp the implications of that potency on the lives of people near and far. Grades 3-6

Volcano! Russell G. Wright, 1996-04 Emphasize the practical and interdisciplinary nature of science with these event-based modules. Using a combination of reading, writing, and hands-on activities, each uses a real-life event and the research news stories that accompanied it to make everyday applications of science real for students. Charts, photographs, diagrams, and reprints of newspaper articles help students identify problems these events pose as seen through the eyes of various experts who respond to each of them.

Nature's Wonderlands, 1989 Teams of writers and photographers traveled to six continents to explore some of the world's finest National parks. Here they present vivid diversity of roles played by today's parklands.
