Child Mandarin Ruya Li,2024-05-10 The Acquisition of Anaphora in Child Mandarin explores how Mandarin speaking children's interpretation of the reflexive *ziji* and their use of null arguments can be understood under the notions of locality and prominence This book investigates the interpretation of *ziji* and the use of null subjects and null objects by experimenting on Mandarin speaking children and adults using a range of experimental techniques such as the truth value judgment task the picture identification task and the story telling task The book provides evidence to show that reflexive binding and argument dropping are determined by the interplay between universal principles and language specific properties It shows that children at the age of 4 make an adult like distinction between the anaphoric and logophoric interpretations of *ziji* The former is subject to the locality condition manifested by the blocking effect on the long distance binding of *ziji* whereas the latter is free from the locality condition and closely related to the understanding of the false beliefs of others This book is an important contribution to language acquisition research and can serve as a valuable reference for graduate students and researchers in the field of language acquisition Chinese linguistics psycholinguistics and cognitive science
