The Journal of the Royal College of General Practitioners, 1984

The GP Trainer's Handbook Paul Middleton, Maurice Price, 2021-08-13 The ten years since the First Edition of this book have witnessed revolutionary changes in GP training appraisal the new MRCGP exam and competence based assessments to name but three Greater availability of information has also transformed the social context of General Practice as a profession Despite this the one to one

relationship between trainer and trainee remains the lynchpin of GP education and this manual's key principle that GP trainers are the key source of expertise in this field and that their experiences and ideas are a vital and still underused resource is as important as ever. This new edition fully revised and updated to reflect the latest changes in both GP training and the profession remains an essential comprehensive manual of useful advice for GP trainers written by their peers. Outlining educational methods, training philosophies and reflections from practitioners experienced in the entire spectrum of GP education, it provides a toolbox of resources to cover the practicalities of training, including e-portfolios, teaching consultation skills and numerous tips and tricks. It is now augmented with an array of supporting online material that includes checklists, forms and evaluation tools. This book is vital reading for GP tutors and GP trainers as well as those considering such roles and for all those who manage and oversee the training of GP registrars. **Irish Medical Journal**, 1984 **Technical Book Review Index**, 1984 *FAMLI*, 1988 *The Prevention of Depression and Anxiety* Rachel Jenkins, Jennifer Newton, Robyn Young, 1992. The GP is in a unique position to play a key role in the prevention of depression and anxiety; in fact, psychological problems are prominent in about a quarter of consultations with adults. However, there is a dearth of research or literature available to enable a preventative strategy to be developed. This volume is based on presentations given at a conference in this subject held at the Royal College of Physicians. It will be of great value to GPs and primary care teams and those members of the primary care team at present in training. **Medical Journal of Australia**, 1995-07 Tutorials in General Practice Michael Mead, Henry Patterson, 1992. This book presents a series of tutorials that resulted from a debate between a trainer and a trainee in general practice to find what the trainee needed to learn, what the trainer had to teach and how this might be achieved. The aim is to give the reader a fundamental understanding of the conditions encountered in general practice and a summary of the organization of health care in the UK. Each chapter contains an introductory paragraph giving basic information about the problem or symptom, which can be obtained from a review of the literature on the nature of the problem, its incidence and prevalence, and a comment on its significance. This is followed by a brief outline of a case as it is presented. The presentation is divided into steps and the tutorial discussion takes place as the problem unfolds. The tutorial emphasizes the history and examination, thought to be relevant, and discusses issues which were raised. Finally, where possible, the outcome of the case is recorded and a summary of the teaching points is given for any future revision. The second edition of this textbook contains two new chapters on the nature of the tutorial and the GP's New Contract. *British Book News* British Council, 1983.
