World Politics Debated:

Time and world politics Kimberly Hutchings, 2013-07-19 This book offers the first authoritative guide to assumptions about time in theories of contemporary world politics It demonstrates how predominant theories of the international or global present are affected by temporal assumptions grounded in western political thought that fundamentally shape what we can and cannot know about world politics today The first part of the book traces the philosophical roots of assumptions about time in contemporary political theory The second part examines contemporary theories of world politics including liberal and realist International Relations theories and the work of Habermas Hardt and Negri Virilio and Agamben In each case it is argued assumptions about political time ensure the identification of the particular temporality of western experience with the political temporality of the world as such and put the theorist in the unsustainable position of holding the key to the direction of world history In the final chapter the book draws on postcolonial and feminist thinking and the philosophical accounts of political time in the work of Derrida and Deleuze to develop a new untimely way of thinking about time in world politics

Rethinking World Politics Philip G. Cerny, 2010-03-24 Rethinking World Politics is a major intervention into a central debate in international relations how has globalization transformed world politics Most work on world politics still presumes the following in domestic affairs individual states function as essentially unified entities and in international affairs stable nation states interact with each other In this scholarship the state lies at the center it is what politics is all about However Philip Cerny contends that recent experience suggests another process at work transnational neopluralism In the

old version of pluralist theory the state is less a cohesive and unified entity than a varyingly stable amalgam of competing and cross cutting interest groups that surround and populate it Cerny explains that contemporary world politics is subject to similar pressures from a wide variety of sub and supra national actors many of which are organized transnationally rather than nationally In recent years the ability of transnational governance bodies NGOs and transnational firms to shape world politics has steadily grown Importantly the rapidly growing transnational linkages among groups and the emergence of increasingly influential even powerful cross border interest and value groups is new These processes are not replacing nation states but they are forging new transnational webs of power States he argues are themselves increasingly trapped in these webs After mapping out the dynamics behind contemporary world politics Cerny closes by prognosticating where this might all lead Sweeping in its scope *Rethinking World Politics* is a landmark work of international relations theory that upends much of our received wisdom about how world politics works and offers us new ways to think about the forces shaping the contemporary world
