

World Population Peak

The Top 10 Countries by 2100

Will the global population surpass 10 billion by the end of the century? All signs have pointed to yes—until now. Steadily rising estimates from the United Nations have typically been the status quo. However, recent research from the Institute for Health Metrics and Evaluation (IHME) suggests that the global population may actually start shrinking well before 2100.

Here's another look at these complex projections.

Global Population Projections

Here's how IHME projects the most populous countries will change by 2100.

Top 10 Countries by Population

Various demographic factors, from lower fertility rates to higher life expectancies, are key reasons behind these differing estimates.

World Population In Transition:

World Population in Transition American Academy of Political and Social Science, 1945 *Global Population in Transition* Jo. M. Martins, Fei Guo, David A. Swanson, 2018-04-12 This book deals with macro and micro aspects of population change and their inter face with socio economic factors and impact It examines theoretical notions and pursues their empirical manifestations and uses multidisciplinary approaches to population change and diversity It investigates the organic nature of the relationships between socio economic factors and population change and the feedback loops that affect socio economic organisation and behaviour The book brings together material often scattered in a number of sources and disciplines that helps to understand population change and their socio economic aspects In addition to dealing with the more conventional factors in population dynamics in the form of fertility mortality and migration the book examines socio economic forces that influence them It discusses population evolving attributes that affect population characteristics and social and behaviour and impact on the environment Further it deals with social organisation and pathways that lead to different social and economic development and standards of living of diverse populations
