The World's Vanishing Birds Cyril Littlewood, 1972 *EXTINCT AND VANISHING BIRDS OF THE WORLD. 1967* J.C. GREENWAY, **Extinct and Vanishing Birds of the World** James C. Greenway, Jr., 1979-01-01 **Extinct and Vanishing Birds of the World** James Cowan Greenway, 1967 Since the disappearance of the last dodo some 280 years ago over 130 species and subspecies of birds have completely disappeared or have become seriously threatened with extinction The passenger pigeon Labrador duck great auk the nearly extinct ivory billed woodpecker and whooping crane are but a few of the many varieties of parrot owl thrush honeycreeper duck sparrow etc which have been wiped out usually due to man s interference Greenway s book is the first up to date comprehensive survey of extinct and vanishing birds and as such it serves as a strong warning about steps which must be taken to prevent the total disappearance of the threatened species He begins with an area by area survey of important lost and disappearing birds carefully noting all possible causes for their disappearance Then each species and subspecies is discussed individually with detailed information on nomenclature last sightings range description habits and similar material Back cover **Storks, Ibises and Spoonbills of the World** James Hancock, James A. Kushlan, M. Philip Kahl, 2010-09-30 Everything you ever wanted to know about storks ibises and spoonbills Some of the world s largest and most spectacular birds are to be found among this group of wading birds Tragically they also include many of the world s most endangered species as changes in land use erode their wetland habitats Some like the White Stork have lived alongside humans for hundreds of years and are well known from numerous studies Others like the Storm s stork and ibises of West Africa South East Asia and South America live so secluded a life in the remote corners of the globe that they will probably be extinct before even the most basic details of their biology are known In this monograph three authors and two artists have combined their skills to capture what is known of this group of wading birds The text opens with general chapters on taxonomy and feeding breeding and behaviour followed by detailed coverage of each species

Around the World in 80 Species Jill Atkins, Barry Atkins, 2018-11-08 The world is currently experiencing a sixth period of mass species extinction and extinction of flora and fauna is caused by a variety of factors arising from industrial activity and increasing human population such as global warming climate change habitat loss pollution and use of pesticides Most causes of extinction are linked to corporate activity either directly or indirectly *Around the World in 80 Species Exploring the Business of Extinction* responds to the ongoing mass extinction crisis engulfing our planet by exploring the ways in which accounting business and finance can be used to prevent species extinctions From Africa to the Far East and from Europe to the Americas the authors explore species loss and how businesses can stop mass extinctions through greater transparency and through closer engagement with their investors and wildlife organisations The book concludes that global capitalism has led us to this extinction crisis and that therefore the mechanisms of capitalism namely accounting finance investment can help to pull us out Businesses must urgently address extinction before it is too late for all species including ourselves As the

The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first

Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in *Nature's Ghosts* the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson's day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them *Nature's Ghosts* offers an unprecedented view of what we've lost and a stark reminder of the hard work of preservation still ahead
