Scherl, University of Illinois at Urbana-Champaign. Department of Computer Science, 1993 The integration of these special
purpose reasoners and the general deductive system is accomplished by drawing upon general results in the area of hybrid
reasoning It is argued that a number of existing modal deduction methods can be viewed as instances of this general
framework The advantages of the general approach are simple proofs of correctness for various instances of the framework
applicability to a wide variety of logics and proof methods and ease in incorporating additional features not currently
available in automated modal deductive systems The greater expressivity of logics with these additional features is needed in
