2007 could perhaps accurately be described as the year when climate change finally received the attention that this

result of the findings of the Fourth sessment Report AR4 of the Intergovernmental Panel on Climate Change IPCC which
were disseminated on a large scale and reported extensively by the media This was the result not only of a heightened
interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted
to spread the findings of its AR4 to the public at large The interest generated on the scientific realities of climate change was
further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore By taking
